País: Türkiye / Turkey Región: Antalya Subregión: Kaş / Kas Ciudad: Kalkan		
Dificultad: no tan difícil	Grado: v3 a2 III	Tiempo total: 5h25
Tiempo acceso: 15min	Tiempo tour: 5h	Tiempo regreso: 10min
Altitud de entrada: 625m	Altitud de salida: 15m	Altitud delta: 610m
Longitud del cañón: 2700m	Rapel más alto: 27m	Cantidad rapells: 27
Transporte: Coche opcional	Tipo de roca: limestone	Zona de entrada: km ²
Temporada:	Orientación: Sur	Mejor época:
Clasificación: ★ 3.2 (3)	Información: ★ 0 ()	Belay: ★ 2 (1)
Especialidades:		
Equipo: Cuerdas: 2x30m		
Resumen: (traducción alternativa) Rappel canyon with walking passages, mostly without water flow in the gorge area. Continuous water flow can be expected at the beginning of the year until around March/April.		
Hidrología:		
Acceso: (traducción alternativa) Shuttle displayed. One car down at Kaputas beach between Kas and Kalkan. The second car above Kalkan on road 07-53 towards Elmali. After 6.1 km from Kalkan, past a fountain on the right-hand side of the road, park your car in an open space at the side of the road and above the river. For the transfer route (13.5 km)see http://www.wikiloc.com/wikiloc/view.do?id=13938225		
Acceso: (traducción alternativa) From the road, initially without a path down to the river, we come across a path running parallel to the slope. Follow this downhill above the river until it finally winds down into the river bed (near a pipeline that crosses the river here).		
Recorrido: (traducción alternativa) First in the open riverbed, which usually still has water at the beginning. After just a few minutes, the water seeps into the ground and the descent continues - apart from a small but deep pool that can be climbed around - in the dry. Only after a walk of around 1.5 hours and a few passages for downclimbing do we come across the first compelling rappel. The canyon becomes more and more notchy and becomes more and more attractive. There are 27 rappels to complete. They are listed in detail at http://www.wikiloc.com/wikiloc/view.do?id=13937747 .		
Regreso: (traducción alternativa) After the attractive 27th and last rappel (27m), we walk a few minutes further, climb over the wall of a water drainage (under the road bridge) and come to Kaputas beach, which invites you to swim directly after the dry gorge. We then walk up the steps to the road and back to the car.
