Entry by rappelling down to the water intake. Then a few rappels. Anchor points would have been helpful at two spots, but we got past them by downclimbing. Otherwise, everything was great. (traducción alternativa)

A nice extension to the inferior section. Very steep climb in places. Two new pitons installed. Start rappelling from the piton on the wall next to the railing. A 50-meter rope is sufficient. Beautiful rock formations, just like in the inferior section. From the exit of the canyon, it’s a 10-minute hike along the stream bed to the entry of the inferior section. (traducción alternativa)
