Resumen: (traducción alternativa) Beautiful short aquatic lime canyon; some jumping and slides; fresh clean water; southwest exposure; can be combined with Rio Lomming.		
Hidrología:		
Acceso: (traducción alternativa) The village of Resuitta lies between Chiusaforte and Carnia. From here you drive into the beautiful Resia Valley. Follow the road signposted "Stolvizza" and "Coritis". After the village of Stolvizza, the road first leads downhill. You cross the T. Resia (follow the signs for "Coritis"). The road then climbs up some narrow hairpin bends to a chapel. From here, the road leads slightly downhill again. After approx. 2.2 km from the chapel, you cross two small road bridges (R. Slatina and T. Resia) in quick succession. Immediately after the second bridge, follow the forest road left downhill for 400m to the very back of the trail (Caution! You cross 2 stream crossings and therefore need some ground clearance). At the end (after the 2nd crossing) the forest road bends to the right. You can either park your car here or follow the forest road uphill for approx. 100m and park your car directly at the hiking trail signpost 657 (entry/exit parking lot). (P.s. It is 9km from the sign at the end of Resiutta to Stolvizza and 4.4km from Stolvizza to the two small bridges).		
Acceso: (traducción alternativa) From the parking lot directly at the hiking signpost 657 ("Birio Sant", "Sella Grubia"), follow the path orographic to the right of the stream. At the wooden plaque with the depicted bird, the hiking trail leads upwards. Follow this for approx. 140m until an inconspicuous path branches off to the right (marked path goes to the left. On the right is a dry streambed). Follow the path next to the gorge until you reach a gravel slope (2 red dots). Then follow/descend the steep gravel slope over red dots to the streambed. Entry at approx. 670m.		
Recorrido: (traducción alternativa) The access is not easy and rather long in relation to the tour. Nevertheless, the Rio Ronc is a worthwhile canyon. Especially those who like to slide and jump will get their money's worth. After a short section of walking, the first 2 abseiling points are reached; 3m and 20m. The 20m step is also the highest point. Most of the following steps can be slid or jumped, depending on the water level. Between the steps, there are always short walking passages with beautiful washouts. The tour exits at the access path at approx. 600m.		
Regreso: (traducción alternativa) Climb out of the stream to the right onto the access path and shortly back to the parking lot.		
Coordenadas: Inicio del Cañón 46.3569 13.3937 Aparcamiento Entrada y Salida 46.3520 13.3881 Final del Cañón 46.3524 13.3911

Unfortunately, all the pools are filled. There is not a single jump in them. But there have been such before. Let's hope it will be cleaned up next year. Water was average

Nothing can be jumped or slid at the moment. The whole canyon is full of gravel. The water is often only knee-deep. (traducción alternativa)

Canyon buried, topogan paid out, jumping pools buried. Attention, check the bottom. (traducción alternativa)

We were surprised by how nice this canyon was. Except for the first 2 dry rappels, everything was jumpable/slidable. At the end, just before the exit, there's a small 3m slide, which could use a bolt so you can check the bottom.

Everything tip top. You can jump everything. Everything super deep

Slides and jumps all doable, on the first jump before the 20m rappel the tab on the bolt is missing, but can be easily downclimbed to check the basin. Otherwise everything tip top. (traducción alternativa)

There was no 2nd or third abseil point. A jump was not possible as it was too shallow from above. We rappelled down the trapped tree. If it is not there, the ropes can be laid over the entire boulder. Otherwise superiore beautiful and great jumping opportunities. (traducción alternativa)

2024-07-14 | Marosffy Dániel | ★★★★★ | 📖★★ | 📍★★★★ | 🌊 Normal | 🍏 Completado
Rope is only required for the first 2 rappels, otherwise everything can be jumped or slid. All pools are clear.
