<b>Resumen:</b> (traducción alternativa) A short but rewarding canyon that is often used commercially. Note: The Furon "Express" (p. 102) described in Hauser/Baratin is only the last small part of the Furon amont, which is no longer feasible because the landowner has forbidden the crossing of his property.		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) 6km NW of Grenoble, at the foot of the Vercors massif, on the left bank of the Isere, where the Drac flows into the Isere, there is a suburb of Grenoble called Sassenage. It is easy to reach via the D1532 (Av. de Valence). In Sassenage itself, at the traffic circle with the beautiful waterfall monument, take the exit onto the D531 (Route de Villard de Lans) heading west. The road turns north at another traffic circle and then climbs in 5 hairpin bends. From the traffic circle it is about 12 km until we reach the parking lot on the left.		
<b>Acceso:</b> (traducción alternativa) From the parking lot we have 2 options for access. In both cases, the entry point is above the bridge. The normal access is well signposted.		
<b>Recorrido:</b> (traducción alternativa) Entry here can be made by jumping (9 m), but can also be rappelled. This is followed by jumps, slides and some smaller rappels. Overall very beautiful washouts, great canyon atmosphere but very short. However, this makes it absolutely suitable for families. The first two steps in the narrows can be bypassed on the slope to the left. There are also enough anchors and bolts to practise some rope techniques, rescue techniques and ropeway construction. The lower part of the Furon can also be climbed, see Furon aval. Climbing is prohibited between the upper and lower sections.		
<b>Regreso:</b> (traducción alternativa) At the exit on the right, first climb up a small via ferrata, then take a clearly signposted path back to the bridge and up to the car.
