Resumen: (traducción alternativa)
Beautifully washed out and continuous gorge above Forni di Sotto, unfortunately short in relation to the rather wild approach trail. Still named Rio Priva on OSM.

Hidrología: (traducción alternativa)
Slippery rock and water that quickly becomes cloudy

Acceso: (traducción alternativa)
From Ampezzo to Forno di Sotto. In the village center, turn left at an inn and a bar to reach a large parking lot south of the village.

Acceso: (traducción alternativa)
Ascend through the village and follow the signs 'Alla scoperta di Faust'. Pass a climbing garden into the Torrente Auza valley. When the marked hiking trail branches off to the right, stay on the clear path into the valley floor. The path is initially marked with many red dots (access to the power station), just before a wooden bridge we descend to the left onto an old hunters path.
With many hairpin bends to a landslide zone and cross this somewhat unpleasantly. Continue steeply uphill on the other side until you can cross into the Torrente Auza valley at an altitude of approx. 1250m. Once in the wide streambed, descend briefly to the beginning of the gorge.

Recorrido: (traducción alternativa)
First downclimb on the orographic left bank, then slippery on the orographic right bank to the first waterfall.
Rappel 8m from the ring bolt on the right.
15m rappel from ring bolt left
20m rappel left from anchor with chain link
3m jump
20m rappel from anchor with chain link on the right
20m rappel from anchor with chain link on the left, gorge becomes narrow
25m rappel from ring bolt on the right over the pool
25m rappel from ring bolt on the right
Exit of the gorge
5min hiking and downclimbing
3m rappel from ring bolt right over dam
Power station, rappel left via via ferrata or 6m rappel, then climb up to path on the right or ascend a little further down after the bridge on the left.

Regreso: (traducción alternativa)
Descend along the access path from the power station. First on the left bank, then over a wooden bridge to the right bank. Then return to the car via the access path.

First ascent. Unfortunately only a 2.5-star rating from me due to the access. Strenuous with tricky passages. The canyon itself has a strong nutrient input in the upper reaches, making it very slippery. Too bad because the rappels are very continuous in compact rock. Definitely a canyon for adventurers and collectors ◫ (traducción alternativa)
