Resumen: (traducción alternativa)
Short rappel canyon, continuation of Mesonas (see there).
Recommended only in spring. In summer, stagnant water.

Hidrología:

Acceso: (traducción alternativa)
From Agios Nikolaos on the so-called New Road (No. 90/E 75) towards Sitia, past Pachia Ammos (up to here 19 km). The road to Ierapetra turns off to the right (south). We continue straight ahead (east) towards Sitia and reach Kavousi after 5 km. We drive through the village and turn right at the last houses and before the bridge (sign 'Archeological Site'). Just before the road starts to climb, we park a car.
We then drive up the concrete road, ignoring the turn-off to the 'Archeological Site' (2.2 km from the turn-off from the E 75) and pass one of the oldest olive trees in Crete. Then we go downhill a little and cross a streambed (4.3 km): to the right (south) the Mesonas exits, to the left the Havgas begins. We park the other car here and, unless we have a second vehicle, we can walk up a path on the orographic right-hand slope, always close to the canyon. When you reach the dirt road, turn right to the entry.

Acceso: (traducción alternativa)
From the upper car walk a few meters along the right bank of the streambed until a walk in the streambed appears.

Recorrido: (traducción alternativa)
At the big pool at the beginning the first one should be equipped with neo and build a rope ferry (see photo!)

Regreso: (traducción alternativa)
After the last rappel through the slot in the rock face (at least that's how the observer below sees it) continue a bit in the streambed and then out to the left to the vehicle.
