Resumen: (traducción alternativa) After the entry in a forest canyon, succession of vertical rappels until the exit on a small bridge on a more level terrain. Alternatively, you can continue here to finally reach the steep 100m drop of Cascade della Froda (Cf. Torrente Froda inferiore).		
Hidrología:		
Acceso: (traducción alternativa) From Luino, on the eastern shore of Lake Maggiore, we take SP 69 to Castello Castelveccana (9.4 km). We leave this road here to the left on the SP 7 - Via Galileo Galilei - in the direction of Nazca, Sant'Antonio, Arcumeggia. The road now climbs steadily, we see the 100m high Cascade della Froda (cf. Froda inferiore) and 4.8 km after turning off the SP 69 in Castelveccana we reach a prominent left-hand serpentine. Here we park the lower car. In the hairpin bend a footpath from the west meets the road. If we walk along it for about 5 minutes until we reach a footbridge (it is also the way back after the exit), we can check the water level in the Froda. With the second car we then continue for another 550 m and then turn right onto the SP 8 ("Passo Cuvignone"). On the Sp 8 we go uphill for a good 1100 m and then we look for a suitable parking place.		
Acceso: (traducción alternativa) We go downhill in the sparse deciduous forest, keeping diagonally towards the stream (Froda) flowing below us. Relatively late we enter the stream and soon come to the first rappel.		
Recorrido: (traducción alternativa) As already mentioned, a succession of 11 rappels begins vertically. This opens up beautiful views as far as Lake Maggiore and the Ticino mountains towering behind. Exit at the small bridge if you don't want to join the Froda inferiore. 01- C4 (2 sx) 02- C5 (MC 2sx + 2sx) 03- C6 (2 dx) 04- C15 (2sx + dev dx -8m) 05- C10 (2 sx) 06- C17 (MC 2dx + 2dx) 07- C40 (MC 2 dx + 2 dx) 08- C 15 (2sx + dev sx -7m) 09- C8 (2 dx) 10- C14 (2 sx)		
Regreso: (traducción alternativa) At the bridge out to the right on the trail and in a few minutes to the lower car.

Automatisch importiert von Descente-Canyon.com für Canyon Froda (superiore) Première partie avec beaucoup d'arbres tombés récemment rendant la progression chaotique jusqu'au croisement avec le premier sentier reliant San Antonio. A éviter. Équipement ok. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23217/observations.html>)
