Cuerdas: 2x45m

Resumen: (traducción alternativa)
Varied rappel canyon

Hidrología:

Acceso: (traducción alternativa)
From Domodossola on the orographic left bank road above Torr. Bogna up to Cisore (about 3 km from the center of Domodossola). At the road junction turn left to the large square with wooden huts and garbage (2006). Park here.

Acceso: (traducción alternativa)
From the parking lot back to the main road, turn left on it for approx. 200 m, then (510 m above sea level) follow the mule track to the right in a WNW uphill direction (white-red markings), turn right at the junction (left "MTB"). We walk uphill, from the left below comes a path with white-red markings, we continue uphill to about 650 m above sea level. Here, at a large cairn, continue uphill on the ridge to about 750m above sea level. Keep right here and descend over a rocky but tree-covered flank into the stream, which we reach a few meters above the C 30.You can also enter at 625 m above sea level if you do not continue uphill at the large cairn, but descend essentially horizontally, finally steeply down into the streambed.

Recorrido: (traducción alternativa)
If you want to go Rio Deseno from the top (1375 m a.s.l.), you have 3 hours of ascent and 11 hours of descent ahead of you. Thus, the exploration of an intermediate entrance has offered itself. Even so, it is still a day trip with over 20 rappel.

Regreso: (traducción alternativa)
At the slide brake downclimb right and on the slope crossing the stream right up to the road, cross it offset to the right and through the vineyards up to Cisore.

Coordenadas:
Inicio del Cañón 46.1321 8.2647
Final del Cañón 46.1255 8.2696
Inicio del Cañón 46.1277 8.2678
Aparcamiento Entrada y Salida 46.1244 8.2659

We’re taking advantage of the rain to explore these streams, which are usually low on water (especially during this dry season) The canyon is beautiful; there’s a series of waterfalls that’s truly worth seeing... Others are less spectacular, but with this much water flow, it’s definitely worth the trip... Some of the anchor points are very “creative,” but oh well... Great day—thanks, Giò and Carla (traducción alternativa)

Access at the top not easy to find and a little slippery. We have cleared the path at the top of leaves and branches. Now easier to find. Anchors are a mix of "home-made" (DIY store chain and washer) and new bolts. A nice rappel canyon in itself. At the dam at the bottom, rappel down the tree again and then out onto the wide forest path. (traducción alternativa)

Let's say if it's your first time in the area it's not the most recommended creek...but if the water levels in the other big canyo. Are stroppo high it is still an interesting canyon with some not bad passages, indeed, after a storm with high flow as we descended it also becomes technical for tight rappels under jet. 1ual few difficult retrieves (traducción alternativa)
