Resumen: (traducción alternativa)
Alpine rappel canyon that continues in the lower Tuwaldbach (see description there). No jumps or slides.

Hidrología:

Acceso: (traducción alternativa)
From Schwaz in the Inn valley to Vomp and in the village near the church north towards Vomperberg. At the following junctions always keep left in the direction of Gasthaus Karwendelrast. Once here, park your car in a suitable place.

Acceso: (traducción alternativa)
From the Karwendelrast inn (860 m above sea level) on a forest road for about 1500 m in a westerly direction until a path (no. 224) turns off to the left to the 'Hallangerhaus'. Soon you come to the Haag Bründl (Stub Bach). Immediately after the brook the path branches off. At the same altitude you would continue to Vomper Loch and to the entry into the Unterer Tuwaldbach (Lower Kühsoacher). But we take the path to the right up to the Tawaldhütte (1274m altitude), direction Niedernissl, Hochnissl Spitze. Immediately after passing the Tawald hunting lodge, the path branches again. To the left, at about the same altitude, we go to the lower entry to the Tiefen Graben at 1260m altitude (at Amor/Riml "E1").\nTo the upper entry at 1670m (at Amor/Riml "E") we continue uphill to about 1600m altitude. Here we turn left off the trail and follow the track through the mountain pines to the entry at 1670m.

Recorrido: (traducción alternativa)
From "E" at 1670m altitude to "E2" about 25 rappel in a mostly deep canyon. \nDuring an ascent in Oct. 2018 - entry "E" - a total of 3 anchors were missing.

Regreso: (traducción alternativa)
Either get off at "E2" on the access path to the Unterer Tuwaldbach and to the Karwendelrast inn or better continue down the Unterer Tuwaldbach to Vomper Loch (for this descent and the following return route see the description Unterer Tuwaldbach/ Unterer Kühsoacher).

Coordenadas:
Inicio del Cañón 47.3584 11.6230
Final del Cañón 47.3493 11.6265

Midpoint entry at Dawaldhütte—unfortunately, just a trickle of water almost all the way to the trail. Still, the scenery is always scenic. A glued anchor on the orographic left was bent, so we drilled a new one on the right. (traducción alternativa)

We went from the very top to the very bottom, almost dry at the top, but enough water to get the ropes wet. We found the rock formations very beautiful, certainly more fun with water. Many places in the 2nd half of the upper part can be downclimbed instead of rappelled. Once we got stuck on a rope. In the lower part there is a stance extremely uncomfortable high to the right, we didn't have a battery drill today so we left it, but next time I'll re-screw the stance. We didn't find the exit, so we climbed steeply on grassy slopes orographically left, we were certainly wrong (1h for 150 meters of altitude). Maybe think about the Vomper Bach up to the power station... (traducción alternativa)

Completely dry in the upper part. Very low water in the lower part. Currently 3 dead chamois in the canyon. But a heap of live chamois around the canyon. (traducción alternativa)
