Especialidades:		
Equipo: Cuerdas: 2x 25m		
Resumen: (traducción alternativa) Varied, rather easy canyon with many rather low abseils.		
Hidrología:		
Acceso: (traducción alternativa) From Morzine, take the Route des Nants in the direction of Samoëns. Park near the ski lift at the exit of Morzine.		
Acceso: (traducción alternativa) Cross under the road through the tunnel and follow the path to the left down into the canyon.		

Recorrido: (traducción alternativa)
Many smaller rappels. The last one is the last one with a height of approx. 22 meters.

Nice descent that merges without much downtime.
A C7 comes before a C6 and two small slides before you come to a car wreck.
After a jump of 3 meters, you cross a C9 and come to a 4-meter slide, which you climb down without ropes (after the usual precautions).
This is followed by a nice C16, followed by a second 8 m slide.
The next waterfall is a C11, from which you can also make a 3-meter jump.
Two waterfalls of 4 and 7 meters follow at once before you reach the viewpoint (C22, which leads into a large pool), where tourists gather halfway up to admire you as you descend to their applause...

Commitment
Throughout the descent, there are numerous escape routes in the DR.

Period/water character
Cold water (07° C in August).
No swimming and only a few jumps possible (4).
Often "infran" during snowmelt (check the water level at Belvedere before descending).

Remarks
Canyon for beginners, quite slippery.
A car wreck in the canyon at the start of the descent.
It is possible to take a 3 km shuttle bus via the D 354 (the approach is then limited to 5 min.).

Regreso: (traducción alternativa)
If you change parking spaces, it's a few minutes along the stream, otherwise take the hiking trail up to the upper parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Nyon Beaucoup de vieilles cordes de partout, ça dénature franchement le site. Celles-ci permettent à des guides d'emmener des clients sous les cascades, mais ce n'est plus tout à fait du canyoning. Et c'est parfois limite dangereux, en tout les "conseils" qui nous ont été donnés n'étaient pas pertinents ... (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2774/observations.html)
