Advertencias:
Prohibido practicar barranquismo (Autoridad del Parque Nacional de las Dolomitas de Belluno)
De conformidad con el artículo 11 de la Ley n.º 394, de 6 de diciembre de 1991, modificada el 9 de julio de 2021, queda prohibido la práctica del barranquismo. https://www.dolomitipark.it/wp-content/uploads/2021/07/Regolamento-PNDB_GU-n.163_20210709.pdf

Especialidades:
§ Prohibición,

Equipo:
Cuerdas: 2x40m

Resumen: (traducción alternativa)
Varied, aquatic and long rappel canyon in an attractive environment.

Hidrología:

Acceso: (traducción alternativa)
From Belluno on the SS 203 towards Agordo. After passing through the village of Mas (8 km from Belluno), continue north along the orographic left bank of the Torrente Cordevole. About 5.5 km after Mas you come to the houses of the hamlet of Casa Candaten, where there is also a camper van site and a picnic area to the west of the road.
Park here.

Acceso: (traducción alternativa)
Cross the Torrente Cordevole and head towards the opposite cut of the Val Fogarè. Here you meet a footpath that you follow downstream in a southerly direction. After a few hundred meters, turn right up a path that will take you in about an hour to the middle entry at the water diversion (the map sketch by P. v. Duin on p. 277 is inaccurate in this regard!). \n \nIf we want to take the upper entry, we follow the path along Torrente Cordevole further downstream until another blue-marked path goes up the slope on the right. Many balue and a few red points lead first to Col de la Caseta (822 m), then further up to Col dei Pors (1110 m), a flat ice saddle. Here the path gets lost in the high grass. Cross the saddle straight for about 150m until you meet the markings again at a multi-trunked tree. At first keep slightly to the left uphill through mountain pines and pines to soon find a sign 'Monte Alta' on the right side of the ridge. Here, keep to the right and follow the slightly descending path until you reach a small wooden sign 'Canyon'. Follow the direction of the arrow and descend steeply and pathlessly for about 100 meters (keep slightly to the left) until you reach an indistinct cross-country path - here again many blue markers and cairns. Follow the path and the markers across or falling over several ditches to the entry in an impressive rock amphitheater. The path is registered in the OSM. There is also an access via the other (northern) side of Val Fogarè (cf. P. v. Duin).

Recorrido: (traducción alternativa)
A succession of almost 30 rappels (superiore & inferiore), no long runs, some possible jumps, a grotto. The middle access and exit point is at a water drainage at an altitude of 620m. Val Fogarè is located in the Parco Nazionale Dolomiti where canyoning is prohibited. The A.I.C. management has been negotiating with the national park administration for some time in this regard.

Regreso: (traducción alternativa)
In the streambed under the covered canal out to Torrente Cordevole and across to the far bank to the car.

Coordenadas:
Inicio del Cañón 46.2052 12.1019
Aparcamiento Entrada y Salida 46.1995 12.1254
Final del Cañón 46.2080 12.1162
Salida Alternativa del Cañón 46.2061 12.0930

I've been told that the trail leading to the top is challenging in places, especially the final section, which is quite exposed. It can sometimes be difficult to find the right path. The anchors are generally in good condition, except for a few rusty ones or plates that wobble. One bolt in particular doesn't seem to have been properly driven in, as the nut doesn't even grip the anchor to tighten it. One bolt couldn't be found at all, but they managed to climb down anyway. Otherwise, I've been told it's a stunning gorge with a great atmosphere. It's a shame that a solution hasn't yet been found to at least open it during certain times of the year. For now, we'll have to wait and see how things develop. (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Fogarè inf DC, Magnifique cette descente du secteur bellunesi, plutôt ludique quand on va chercher les saut, le passage de la grotte incroyable, l'equipement qui est très déconcertant comme la plupart des canyon du coins, fortement dégueu a quasi tout les relais debrayable du bas sur debrayable du bas, le mot d'ordre discrétion ! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23065/observations.html)

It is reported that from elevation 1150 up to 640 (beginning of lower part) all arms are ok. Three-hour approach. On the approach, after the junction to Mont Alt (follow right slightly downhill) the trail has been cleared of large branches in between and marked with cairns. (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Fogarè inf Superbe canyon! Eau émeraude, approche facile. Le passage de la grotte est exceptionnel ...Attention,le sentier d'accès et de retour sans traverser le collecteur (impossible aujourd'hui) a été emporté par les crues du début de semaine, il est maintenant quasiment impossible d'y passer... (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23065/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Fogarè inf Approach path on the right bank has been washed away and was hard to find. We left a cairn witch is visible from the riverbank in front of the canyon.From there on it was a small and overgrown path steep up. Once at the railing it becomes clear.The canyon it self was beautiful with clear blue/greenish water, nice abseils and a few jumps. Some relays are a bit old but all OK.
