Especialidades:

Equipo:
Cuerdas: 2x 90m

Resumen: (traducción alternativa)
Short but technical tour through the 40m shooting channel at the beginning of the 90m rappel. However, stones can be laid so that less water passes through the abseil channel.

Hidrología:

Acceso: (traducción alternativa)
From Bellinzona, take the road on the right bank of the Ticino towards Tenero and Locarno. You pass through the village of Sementina. Cross the Sementina here. Immediately after the bridge, turn right and park at the side of the road.

Acceso: (traducción alternativa)
Take the car back over the bridge and take the first road to the left. At the exit of the short road, follow the road directly to the left. At the next junction, keep left again and after three hairpin bends continue straight on for a short distance until you see a large house on the right (probably a water supply)

Recorrido: (traducción alternativa)
Two mini rappels, then c90. Directly after this you can ascend again orographically to the left to make another passage.
Caution: there is a sharp edge in the C90.

Regreso: (traducción alternativa)
Walk in the stream for about 30 minutes.

Done at full moon, cool thing to rappel almost 100m at night without a headlamp. (traducción alternativa)

Anchors ok, in the 90 extreme cable pull especially in the upper range (without brake stage), short nice canyon (traducción alternativa)

Nothing special to notice. Only the rope pull on the 90m is really strong at the water level so that you can easily let go of the rope at the top with the deepest friction level and it doesn't start to slide. Then it's a concentrated descent upside down. (traducción alternativa)
