Clasificación: ☆ 2.4 (3)	**Información:** ★ 1.5 (2)	**Belay:** ★ 2.5 (2)

Especialidades:
Permiso requerido, Absolutamente seco,

Equipo:
Cuerdas: 3x30m

Resumen: (traducción alternativa)
Long and beautifully shaped gorge, only carrying water after a long rainy season.
Otherwise dry except for a disgusting pool (cable car possible).

Hidrología:

Acceso: (traducción alternativa)
From Inca on the MA2130 in the direction of Lluc. At the top of the mountain pass, take the MA10 and follow it to the left towards Soller, then take a winding road towards Port de sa Calobra. Before you reach the 'Col des Reis' mountain pass, you can park in a bend to the right. For the parking exit, follow the road towards the sea and follow the signs for Cala Tuent
Parking at the prominent 'Nus de sa Corbata' hairpin bends.
If you want to descend to the sea, park a second car at the paid parking lot in Sa Calobra. Car transfer makes sense.

Acceso: (traducción alternativa)
Follow the path marked with cairns to the west, ascending to a mountain shoulder, then descending into the still wide valley of the Torrent del Gorg des Diners

Recorrido: (traducción alternativa)
Several gorge sections separated by a longer walking section. Pools are longer water-bearing, but bypasses or cable cars can generally be set up.

Regreso: (traducción alternativa)
Ideally by car, the way back via the road or the plateau takes 1.5h - 3h

Coordenadas:
Inicio del Cañón 39.8217 2.7979
Aparcamiento a la entrada 39.8249 2.8146
Final del Cañón 39.8352 2.7811
Aparcamiento a la salida 39.8380 2.7791
Salida Alternativa del Cañón 39.8262 2.7916

Automatisch importiert von Descente-Canyon.com für Canyon Diners Au pont aval, Gros débit, mais les 80% viennent de l'affluent rive gauche à la fin du canyon.Au parking amont, un beau ruisseau nous coule dans les pattes et au départ c'est un joli petit ruisseau qui coule. Le débit triple grâce à 2 affluents au niveau de la premiere cascade.Le débit reste identique jusqu'à la fosse septique dont les barreaux et les cordes fixes ont subi des grosses crues.Le débit faibli progressivement jusqu'à l'ultime affluent RG qui fait passer le zambeze pour un ptit ruisseau.Le début est fastidieux avec de longues marches entre les cascades jusqu'à l'encaissement qui est vraiment joli en eau.La fin est pire que le début avec des ronces en plus... (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2850/observations.html)

Everything tip top, except for the lack of water. But still a beautiful tour, as it is a real canyon with very beautiful and impressive individual sections. The run out drags on. Keep to the right at the end. Parking is only possible in the authorized areas. From March with parking sticker at the exit (look carefully). Almost all anchors are new and made of stainless steel. By chance I went into the canyon upstream on the "hiking trail" (from Sa Calobra) (better not to do it!) to test an alternative route to the Torrent de Pareis entry. Canyon well overgrown. Access path really a pain for people in shorts. Grass, thorn bushes and the like do the rest. Got to the 15-20 meter rappel, which looked quite nice from below. There were glued anchors or old rope remnants at the abseil points I found. (traducción alternativa)
