Clasificación: ★ 2.1 (2)	Información: ★ 0 ()	Belay: ★ 0 ()
Especialidades: § Prohibición,		
Equipo: Cuerdas: 2x30m		
Resumen: (traducción alternativa) East-facing hiking and rappel canyon that usually only carries water after heavy rainfall. Access was banned after a species of frog - Ferreret - was discovered there in 1979, which had previously only been known as Fosslie.		
Hidrología:		
Acceso: (traducción alternativa) From the ring road around Palma 33 km on the Ma13 highway to Inca. From here on the Ma2130, past Selva to Calmari (8 km from the highway exit). Here turn right off the Ma2130 and drive 2.5 km in a north-easterly direction to Binibona, where you continue half-left in a northerly direction ("Hotel Abellons"). We always drive along the orographic right bank of the stream (Torrent de Sant Miquel), as far as permitted by road traffic law, probably up to the point where the road towards the hotel bends away from the stream (900m from Binibona).\nWith the second car we return to Calmari and continue uphill on the Ma2130 towards Lluc. After 8 km and a few hundred meters before the top of the pass (Col de la Batalla), after which the road branches off, the road crosses the Torrent de Comafreda. We park our car here.		
Acceso: (traducción alternativa) At the bridge we descend into the streambed.		
Recorrido: (traducción alternativa) First downhill in the relatively open streambed. Sometimes water still flows here, but then seeps away a little later. The sequence of around 14 rappels begins with a 15m rappel with shorter runs in between. We finally come to a slide brake where the descent exits.\nThis is where the somewhat problematic zone begins, where you cannot avoid walking further down the stream over private ground. Shortly before reaching the slope to the right of the stream, we pass a property to the right of the stream ("Sa Coma" - barking dogs) and a barbed wire stretched across the stream.		
Regreso: (traducción alternativa) On the slope downstream to the car.
