Resumen: (traducción alternativa)
Alpine tour with lots of water flow and some slides.

Hidrología:

Acceso: (traducción alternativa)
From Biasca follow the A2 towards Gotthard and take the first exit again. From there, continue on Via S. Gottardo until shortly before Lavorgo, where you turn off towards Chironico. Follow the road to Grumo until you reach the bridge over the Va d'Usèdi. Park your car here.

Acceso: (traducción alternativa)
Two paths branch off near the bridge, one to the river, one uphill. We choose the uphill path. We follow this up to 890 m altitude. Follow the path that crosses into the valley. No further uphill. This junction is difficult to recognize. Follow the path to the landslide. Enter the stream here.

Recorrido: (traducción alternativa)
11 watery rappels that can be very challenging at medium to high water levels. There are several small slides. The rappels are interrupted by running sections.

Regreso: (traducción alternativa)
Before the bridge orogarphically right out of the stream you are directly at the car.

Unfortunately, there was quite a lot of wood in the canyon. We went through the entire canyon. All in all, it was a great experience. (traducción alternativa)

Automatisch importiert von Schlucht.ch für Canyon Valle d'Usèdi, Wasserstand: "DC / normal" Verankerungen: "Gut" Wir haben Usèdi inferiore und anschliessend Barougia gemacht; beide Bäche sehr rutschig, nach unten diesbezüglich immer anstrengender. Schöne Tour mit aktuell idealem Wasserstand für das erste Mal! Mehrere Stellen mit viel verblocktem Schwemmholz - da bräuchte es mal minimal eine Klappsäge ;) Zustieg nach wie vor recht abenteuerlich... Bei um die 900MüM sind wir anstatt leicht runter, links hoch mit leichten Kletterstellen über Wurzeln; kurz danach kommt wieder ein besserer Pfad (keine Ahnung, ob dies die Ideallinie war). Some of the trees are large. They’ve probably been there a long time. Slippery as always. One glued anchor is loose. It should be repaired. Otherwise, everything’s fine. Great climb. (traducción alternativa)

It was pretty slippery to walk on, and there was quite a lot of wood in the canyon. But it was still a beautiful canyon. Access: We followed the trail marked on OpenStreetMap. It took us up to 980 meters above sea level, until we descended about 30 meters to the right toward the stream. (traducción alternativa)

Climbed after the "Superiore." Lots of dead wood; significantly less attractive than the "Superiore." All anchors were in good condition. (traducción alternativa)

There is medium to high water flow today. Some anchors require attention, including one loose single expansion bolt and one glue-in bolt that is flat. It’s a great canyon for capturing beautiful photos.

Automatisch importiert von Schlucht.ch für Canyon Valle d'Usèdi, Wasserstand: "sportlich" Verankerungen: "ok" an besagten Baum zum abseilen ist inzwischen eine Bandschlinge mit Maillonglied. Vom Hochwasser im Frühsommer sind viele neue Bäume in der Schlucht. Schlucht im Moment sehr rutschig. Sehr schöne, abenteuerliche Schlucht (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1203-valle-d-usedi)
