Acceso: (traducción alternativa)
A23 until Pontebba exit. Go down the canal valley until you reach the group of houses of Vidali. After about 1.5km you will pass a pedestrian bridge over the Fella. There is a large parking area just after the bridge.

Acceso: (traducción alternativa)
Cross the bridge and follow the marked trail past the highway parking lot. In the area of the Cadramazzo ruins, turn left up to the bike path and immediately after follow the 619 markings further uphill. Pass the entry of the lower Rio Cadramazzo and continue into a small notch with a view of the canyon of the upper Rio Cadramazzo. Continue climbing until you reach a World War I tunnel and from there cross more flatly into the valley of the Rio Livinal. After crossing a side stream, the path crosses high above the narrow gorge of the Rio Livinal - Above this gorge, descend steeply into the streambed.

The water was 6c. A lot of water compared to Livinal. Between A3-A4. In the 66m shaft, one of the double anchors at 30 meters was missing, the other was loose. I replaced it, repaired it. This was my second time. Still wildly beautiful, with expedition-style construction. Not a beginner canyon. :))

Was walked by us and renovated. Beautiful gorge with a few walking passages. The initial part of the Livinal is particularly cool because narrow cut. Then it becomes a beautiful open canyon with a few walking passages. (traducción alternativa)
