<b>Resumen:</b> (traducción alternativa) If there is enough water, fun canyon with many jumps and slides down to Vesubie.		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) From Nice, head north on the N 202 towards Digne. After 20 km, turn right into the Vésubie valley. Continue on the D 2565 for a further 8 km (approximately) until an iron footbridge for pedestrians crosses the Vésubie on the right. A few meters further on, the lower vehicle can be parked on the hillside next to the road. Continue with the second vehicle until shortly before St Jean la Riviere, the D 19 climbs at an acute angle to the right. Follow the D 19 for approx. 2.5 km to the hamlet of Calencon, where you can park after the houses.		
<b>Acceso:</b> (traducción alternativa) From the parking lot (440 m above sea level), a small path leads down to the stream on the right. For nature conservation reasons, it is forbidden to enter the upper, open part of the streambed. However, there is a well-trodden path throughout, secured with wire ropes and steps where necessary. Entry is directly above the actual gorge.		
<b>Recorrido:</b> (traducción alternativa) Attractive fun and jumping canyon as long as it has running water. Many jumps and well-equipped abseiling points. The highest waterfall can be split to the right using a hanging stand. Below this waterfall, the Canal de la Vésubie crosses the gorge. There is an escape route to the left here. Below there are 3-4 more abseils and a final jump. Exit to the left before reaching the bottom of the Vésubie gorge.		
<b>Regreso:</b> (traducción alternativa) Do not go all the way down to the Vesubie (!), but 10 m above on the left along the slope to the aforementioned iron footbridge (last insured) over the Vésubie and then right to the vehicle parked below.
