País: Portugal **Región:** Região Norte / Norte Region **Subregione:** Braga **Ciudad:** Vilar da Veiga		
Dificultad: un poco difícil	**Grado:** v4 a3 III	**Tiempo total:** 3h47
Tiempo acceso: 1h	**Tiempo tour:** 2h30	**Tiempo regreso:** 17min
Altitud de entrada: 680m	**Altitud de salida:** 480m	**Altitude delta:** 200m
Longitud del cañón: 1000m	**Rapel más alto:** 37m	**Cantidad rapells:** 7
Transporte: Coche obligatorio	**Tipo de roca:**	**Zona de entrada:** km²
Temporada: junio - agosto	**Orientación:**	**Mejor época:**
Clasificación: ☆ 2 (1)	**Información:** ★ 0 ()	**Belay:** ★ 0 ()

Especialidades:

Equipo:
Cuerdas: 2x50m

Resumen: (traducción alternativa)
Beautiful cascades

Hidrología:

Acceso: (traducción alternativa)
We need to get to the town of Fafiao.
Access via Arado, Conho, and Fafiao
From Ourense via the OU312 and then the N308-1. From Verín, Bragança, or Braga via the N103.
Once in Vilar da Veiga, head toward Ermida on the CM1276 and continue on to Fafiao. Before reaching the bridge over the Fafiao River, there is a dirt road (paved at the beginning) on the left that you can drive up as far as your car will go. We'll take a couple of tight curves until we reach a trail junction; here (or earlier if we can't go much further up), we'll leave the car for the return trip.
Take the access road from Ermida along the CM1276, and at the entrance, turn left toward the Arado Waterfall. Drive up to the bridge over the Arado River and continue along that same trail to the top of the mountain (check the trail conditions first), until you reach a house.

Acceso: (traducción alternativa)
If we have two cars, we just need to take the path from the access road that leads down to the river on the right side of the house:
If we have only one car, we need to take the left path at the fork; the right path is the way back. We can drive up to the house and then turn right to take the path down to the river.

Recorrido: (traducción alternativa)
The tour begins at 680m with a longer walking and downclimbing section with a few small steps that can be jumped (be careful!) or downclimbed (max. 10m). After approx. 40-45 minutes you reach the highest abseiling point. First you rappel 10m and then you can choose between the 37m right (slippery) in the water or left out of the water. Shortly afterwards, there is another 20m abseil (left). After this last higher rappel, there are two small slippery steps, the first of which is downclimbed on the left and the next on the right. The following blocked open terrain is bypassed as far left as possible until you reach a forest road (Steinmanderl). Exit at approx. 480m.

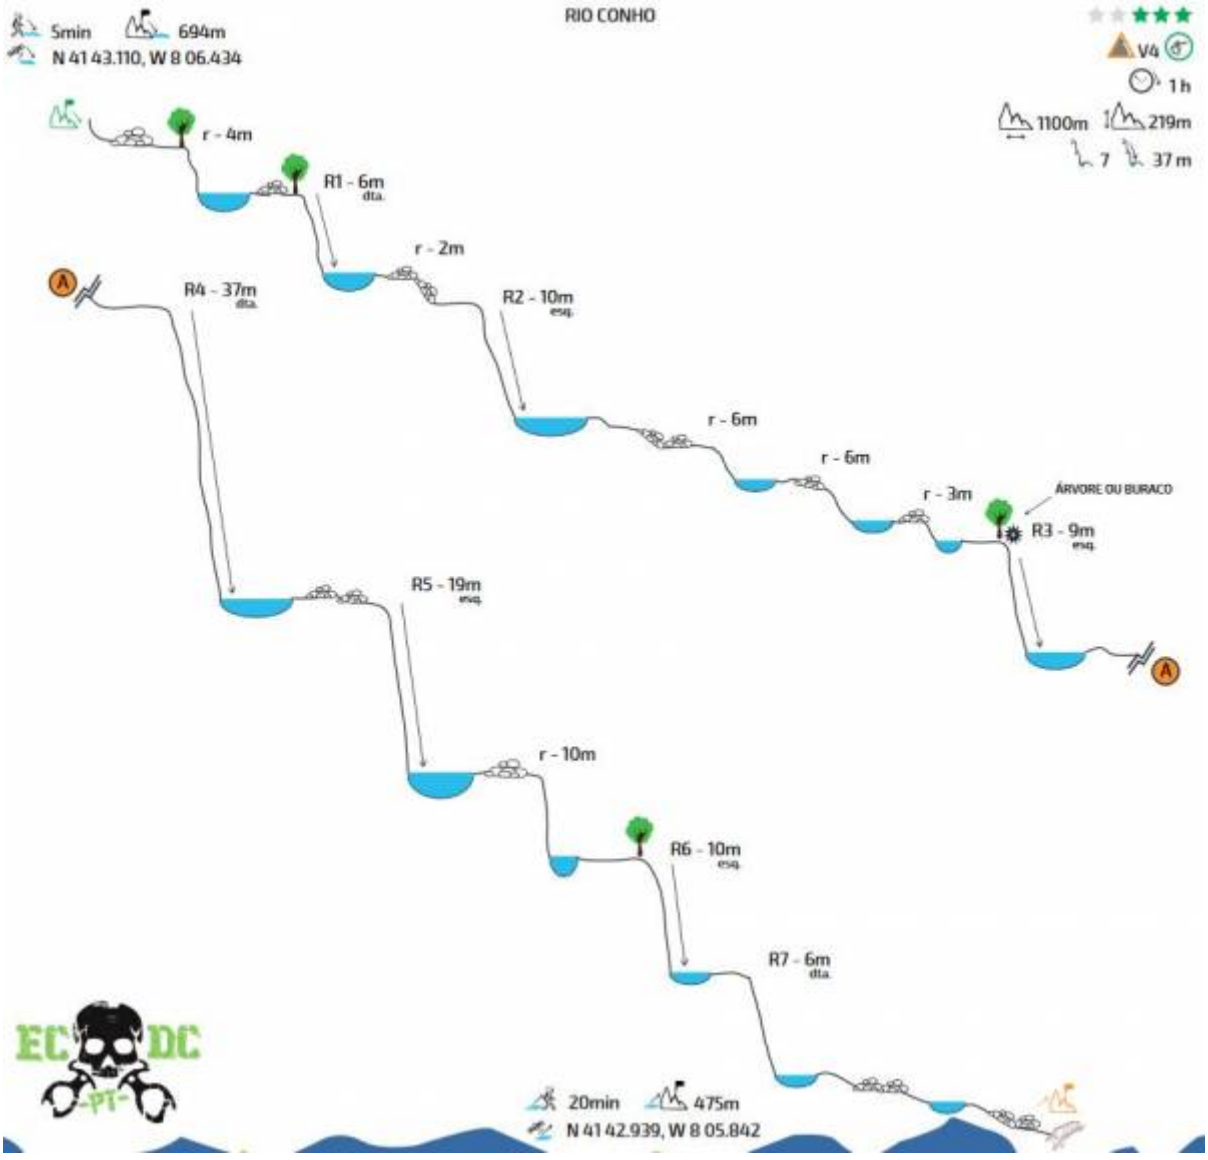

Regreso: (traducción alternativa)
Follow the forest road for only about 80m. Then follow the inconspicuous path left on the orographic right side of the stream. After a while, the path changes to the left side and soon leads to the bridge/parking lot at 380m. Here the stream flows into the Rio Toco.

Coordenadas:
Inicio del Cañón 41.7185 -8.1072
Final del Cañón 41.7157 -8.0972
Aparcamiento a la entrada 41.7090 -8.0940
Aparcamiento a la salida 41.7090 -8.0940
