

Lodrino (inferiore)

Lodrino, Val Lodrino

Crear: 2023-03-09 20:53:45	Actualizar: 2025-11-24 18:20:30	Imprimir: 2026-05-21 10:05:01
País: Schweiz / Switzerland Región: Kanton Tessin / Cantone Ticino Subregión: Bezirk Riviera Ciudad: Lodrino		
Dificultad: difícil	Grado: v5 a5 IV	Tiempo total: 3h50
Tiempo acceso: 15min	Tiempo tour: 3h30	Tiempo regreso: 5min
Altitud de entrada: 490m	Altitud de salida: 280m	Altitude delta: 210m
Longitud del cañón: 900m	Rapel más alto: 45m	Cantidad rapells: 16
Transporte: Coche opcional	Tipo de roca: granite	Zona de entrada: 17.00km ²
Temporada: julio - septiembre	Orientación: Noreste	Mejor época: 10-14 Horas
Clasificación: ★ 4.9 (32)	Información: ★ 2.8 (21)	Belay: ★ 2.6 (31)

Advertencias:

inactivo: Evitar las molestias mediante el descenso masivo de barrancos (11.08.25 - 31.08.25)

Después de la RIC 2025 se han denunciado grandes grupos que causaban basura en los aparcamientos, ocupaban propiedades privadas, hacían fiestas ruidosas después de hacer barranquismo y aparcaban sin tener en cuenta el acceso de los habitantes locales. Las comunidades locales ya están enfadadas. Para evitar consecuencias negativas y regulaciones, por favor asegúrate de que actúas teniendo en cuenta el medio ambiente y las comunidades locales. Por favor utiliza todos los coches completamente para evitar congestiones en los aparcamientos, usa aparcamientos alternativos, se silencioso, restringe el uso del silbato en el barranco al mínimo, respeta la cultura católica local no desnudandote visiblemente y usa ropa para el ascenso. No salga de fiesta después de hacer barranquismo en los aparcamientos y retire la basura, por favor.

Especialidades:

Equipo:

Cuerdas: 2x 50m

Resumen: (traducción alternativa)

Rappel canyon in beautiful granite rock with optional jumps. Very beautiful, deep canyon with turbulent pools and crystal-clear water.

Hidrología: (traducción alternativa)

Can only be walked on without risk after prolonged dry spells

Indicative measuring point, no direct measured value:

Little: <150l/sec; Medium: 150-400l/sec; Much: 400-1000l/sec>; Too much: 1000l/sec

Acceso: (traducción alternativa)

From the freeway junction (Gotthard/Bernardino) north of Bellinzona on the N 2 northwards. Shortly after passing through Cresciano, turn left and drive to the other side of the valley to Lodrino (approx. 12 km from the interchange). Enter the village (on the right) and after the bridge over the stream take the 3rd street on the left. Park your first car behind the cemetery (not at the storage hall) (do not use the parking spaces in front of the supermarket and under the trees in the center of the village). With the second car, drive north towards Iragna and after almost 2 km (from Lodrino), immediately after the houses of Rodaglio, at a commercial establishment (GPS coordinates: 46°19'02.46 "N / 8°58'19.70 "E), just after an inconspicuous chapel, turn left onto a small road that takes us up to the houses of Legri (a fork to the right). - The road continues straight ahead until it ends in an open area (helipad) (or continues as a dirt road to the west). Park the second car here.

The road to the upper parking lot is a private road with toll.

Acceso: (traducción alternativa)

From the upper parking lot, descend on the mentioned slope and where it makes a left turn, turn right onto a path that takes us down to the stream in 15 min (entry). If you have only 1 car, you can go up from Lodrino on a trail to Legri, then take the tarred road to the left to the upper parking area described. Access then about 1 hr. 15 min. in total.

Recorrido: (traducción alternativa)

The Lodrino is accessible without risk only after prolonged drought. If you look up into the narrows at the exit of the canyon (easily accessible from the orographic left side), you get at least an approximate impression of the situation. After some smaller slides and jumps, you are in front of the first real rappel point, a winding 15m channel. If the water level allows it, rappel 15m from the left, or cross to the right to the other exit of the pool and jump down 10m from there. After a few nice bends, you are in front of an almost vertical 11m slide. Dangerous rock bay on the left, keep right when surfacing. Can also be rappelled left. This is followed by an 8m rappel from anchors on the left and two narrow, winding rock canyons before the canyon widens considerably (pathless escape on the left). The second part of the gorge begins with a 7m slide and a 7m jump into a deep pool. This is followed by a very photogenic 9m rappel (Can also be jumped). The next, wild-looking 5m rappel either rappel in the water or bypass right on traverse rope. At the big rappel from two anchors on the right, rappel 5m (install rope traverse) to reach the actual belaystation on the left under the edge. Here it goes down 45m into a large pool. Here you can escape to the right. Pass the dam on the right and downclimb through the chaos of blocks. The last waterfall either rappel 37m from the right in the water jet, or traverse to the left over fixed ropes to a dry belaystation. Finally, rappel another 22m from the belaystation at the top right. Exit possible on a paved path after the 45m rappel. The chute at the beginning of the penultimate (37m) rappel can be avoided by rappelling out of the wire entanglement on the left above; but the turbulence down in the big pool cannot be avoided. Can be well connected with Lodrino med.

Regreso: (traducción alternativa)

After leaving the bottleneck left over the stone wall and gravel road back to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Lodrino (inférieur) TOP! Instalaciones en perfecto estado! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2672/observations.html>)

2025-10-27 | System User | |📖|📍|🌊 Normal |👍 Completado

Automatisch importiert von Descente-Canyon.com für Canyon Lodrino (inférieur) Debit correct voire faible pour ce canyon à cette époque, de la neige présente sur les sommets mais la température assez basse n'a pas joué sur le débit pendant la journée.nous avons aussi descendu la partie intermédiaire. Le tob de 11 mètres dans le début de la partie inf était praticable mais attention au drossage en bas à gauche. Une personne en sécu sur corde peut être une bonne chose. Équipement en état. Corde en fixe dans le même état que les canyons de la région . Canyon tjrs aussi beau, un incontournable (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2672/observations.html>)

2025-10-19 | System User | |📖|📍|🌊 Normal |👍 Completado

Automatisch importiert von Descente-Canyon.com für Canyon Lodrino (inférieur) RAS. Aucun problèmes liés au débit ou mouvement d'eau...Juste rester attentif à l'état des MC.Magnifique mais ca tout le monde le sait... (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2672/observations.html>)

2025-10-16 | Pepijn Hoeksema |★★★★★👉|📖★★★★|📍★|🌊 Normal |👍 Completado

Good trip

2025-10-09 | System User | |📖|📍|🌊 Alto |👍 Completado

Automatisch importiert von Descente-Canyon.com für Canyon Lodrino (inférieur) Débit d'eau similaire à celui de l'Intermedio, mais à notre avis, l'Inferior est plus facile à gérer que l'Intermedio en termes d'eau. Une descente de rêve au Tessin ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2672/observations.html>)
