Resumen: (traducción alternativa)
Beautiful and long swim & hiking canyon with only one 45m rappel at the beginning.

Hidrología:

Acceso: (traducción alternativa)
From Antalya take the E87/D350 northwest towards the village of Düzlerçamı. Approx. 2 km before Düzlerçamı there is a large traffic circle, which you leave to the left onto a straight road (Taharim Cd.). After 1.3 km you leave the straight road onto a dirt road into the forest, which can be driven on in a normal car without any problems. The forest path has a few forks, so it's best to navigate by feel until you reach the parking lot. (Openstreetmap shows the paths very well). The parking lot is located directly at the entry at a small viewing point where you can see the drop-off into the Güver Canyon.

Acceso: (traducción alternativa)
Descend from the parking lot at the top in the direction of the stream.

Recorrido: (traducción alternativa)
Very spectacular 40m rappel into the canyon which can be reached from a stand on the left. The actual abseil stand is on the ortographic left directly opposite the waterfall. Then lots of swimming, downclimbing, jumping, hiking in the canyon, which is up to 50m deep, without emergency exits. There are also some compulsory jumps and slides. To get the best light, you enter the canyon around midday.

Regreso: (traducción alternativa)
At the confluence with Karaman, follow the path to the left (marked in purple); after a few minutes it climbs steeply up to the slope. There is not much point in continuing as the slope is closed off at the top with a barrier and you cannot go any further down

Coordenadas:
Aparcamiento a la entrada 36.9693 30.5686
Inicio del Cañón 36.9695 30.5682
Final del Cañón 36.9470 30.5652
Aparcamiento a la salida 36.9465 30.5751

Just a 40m waterfall that is very impressive. Lots of swimming, block climbing and a few jumps, but in a sensational setting. Ideally, enter the canyon at midday when there are no clouds, when you can enjoy the wonderful play of colors. (traducción alternativa)
