País: Schweiz / Switzerland **Región:** Kanton Tessin / Cantone Ticino **Subregione:** Bezirk Riviera **Ciudad:** Osogna		
Dificultad: un poco difícil	**Grado:** v4 a4 IV	**Tiempo total:** 7h20
Tiempo acceso: 1h30	**Tiempo tour:** 5h30	**Tiempo regreso:** 20min
Altitud de entrada: 835m	**Altitud de salida:** 460m	**Altitude delta:** 375m
Longitud del cañón: 1700m	**Rapel más alto:** 36m	**Cantidad rapells:** 20
Transporte: A pie	**Tipo de roca:** granite	**Zona de entrada:** 14.00km²
Temporada: junio - septiembre	**Orientación:** Oeste	**Mejor época:** 9-12 Horas
Clasificación: ☆ 3.5 (12)	**Información:** ★ 2.7 (6)	**Belay:** ★ 2.4 (11)

Especialidades:
Presa (informar al operador), Presa (descarga autom.),

Equipo:
Cuerdas: 2x40m

Resumen: (traducción alternativa)
Longer and more technical than the upper part.
Many angled and sometimes painful slides.

Hidrología: (traducción alternativa)
If necessary, water supply from the interconnected reservoir canal leading to the power plant (automatic opening of the sluice in case of problems in the canal or in the power plant, as in the case of the accident in 2001: https://www.nzz.ch/article7KF2C-ld.179745).

Acceso: (traducción alternativa)
As for Nala inferiore: from the freeway junction north of Bellinzona, take the N2 towards Biasca. Via Claro and Cresciano we arrive to Osogna (11,4 km from freeway to the bridge over the Nala). After the bridge over the Nala, drive up to the cemetery and leave the car there.

Acceso: (traducción alternativa)
Walk along the path above the parking lot towards the river and descend to the large final basin. Check the water flow, then cross the riverbed to the south and hike along the narrow mountain road to the beginning of the trail to Pönt and Valle di Osogna. After the steep climb to Pönt, the trail flattens out and then enters the Valle di Osogna. At the bridge at 839m the entry starts.

Recorrido: (traducción alternativa)
Between C27 and C19 danger of falling rocks. Highlight of the part is the very narrow cut C23. If the water level is too high for tour participants, one must go through and below set up a rope ferry (then at least 35m of rope required, anchors are available).

Regreso: (traducción alternativa)
Either exit to the right at the beginning of the Nala inferiore and go down the path to Osogna or continue down the Nala inferiore to its exit (see under "Nala inferiore").

Coordenadas:
Inicio del Cañón 46.3168 9.0098
Final del Cañón 46.3157 8.9921
Aparcamiento Entrada y Salida 46.3146 8.9861

Some of the anchors and plates are still old! It would be a good idea to get some new rings. With Maria, Bogdan, and Markus (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Osogna (intermédiaire) DC, très beau et sauvage, mais un peu trop de marche selon moi.Très glissant par endroit et comme dit précédemment, attention au chutes de pierres (ce sont des gros!) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22494/observations.html)

The water was beautifully clear and cold. It was a little slippery, but the slides were good. All the jumps would be doable. A lot of large rocks have recently come down, but they didn't damage anything important. (traducción alternativa)

All the anchors are located in the middle section. Unfortunately, they're very slippery. All the slides are as slippery as an eel and therefore dangerous. (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Osogna (intermédiaire) DC, Très glissant, beaucoup de monopoint dans la première partie, pas forcement judicieusement placés, plusieurs rappels sur arbre. Cordée de 2, départ 13:00, sortie 17:00. Canyon alpin magnifique quoiqu'un peu long à mon goût ehe ! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22494/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Osogna (intermédiaire) « Accès » en hélicoptère à 7h40. Le matin, il fait encore assez frais, l'eau est très froide, en particulier dans les bassins profonds. Au début de la descente, il y a peu d'eau, mais elle augmente progressivement au fil de la randonnée. La qualité de l'équipement est déplorable, on arrive certes à descendre, mais nous avons souvent eu l'impression d'avoir de la chance que les spits tiennent bon.4 heures à trois, l'un d'entre nous connaissait le canyon et l'emplacement des amarrages. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22494/observations.html)

Followed up with the helicopter and then climbed the middle and lower parts. Anchoring in the middle part is inadequate, in the lower part mostly excellent (with a few exceptions). Approx. 6 hours in the canyon (both parts) with three of us, approx. 8 hours incl. reparking, flight, changing clothes. In the middle parts we only had shade, it was very fresh.
