Resumen: (traducción alternativa)
Short rappel canyon down into the Pieve valley

Hidrología:

Acceso: (traducción alternativa)
From Riva del Garda on the SS240, past Lake Ledro and through Storo, we reach the Fiume Pieve after a total of around 35 km, cross it and meet the SS237 on the other bank, which we follow to the NNE. After another 13 km or so, we come to the village of Argro and negotiate a striking double hairpin bend. Immediately afterwards, we turn right at the houses on the right-hand side of the road onto a smaller road. About 150m further on, the road bends to the right in front of a house with a fish farm before crossing the Fiume Pieve a few meters further on in a left-hand bend. In this left-hand bend, we park the car in a suitable place for the exit (exit parking lot). Continue for 1km in the second car; then turn right. The road now leads uphill through the forest. 800m after this turn-off, at the exit of a left-hand serpentine, a dirt road turns off to the right - in a southerly direction. We leave our second car here (parking lot for access).

Acceso: (traducción alternativa)
On foot, we first follow the field path to two houses, pass them and continue walking in the same direction. We come across "our" stream and follow it downstream without a path. Shortly after passing under a power line, the terrain drops steeply and we reach the entry point.

Recorrido: (traducción alternativa)
Several longer rappels (6 in total) down to the Pieve valley.

Regreso: (traducción alternativa)
Once in the valley, we take the dirt road to the right at a bridge and reach the road and the car after a few meters.

Coordenadas:
Inicio del Cañón 45.9536 10.6558
Final del Cañón 45.9550 10.6535
Aparcamiento a la salida 45.9561 10.6532
Aparcamiento a la entrada 45.9549 10.6589

Automatisch importiert von Descente-Canyon.com für Canyon Sadacla Agréable découverte que cette cascata Sadacla même si la mise en route fut quelque peu laborieuse (beaucoup de désescalades glissantes et de troncs d’arbres gênants la progression)…Par contrée le final est de toute beauté les rappels verticaux bien arrosés s’enchaînent pour notre plus grand plaisir…Équipement correct, eau fraîche qui fait le plus grand en cette période caniculaire… (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22590/observations.html)

The beginning of the canyon isn't really worth exploring. So it's best to stick to the trails outside the canyon all the way to the power lines, which don't come into view until later. But at the exit, there are some really nice rappels. (traducción alternativa)

Everything's fine. Thanks to the AIC team for the restoration!!! The short canyon has two nice, long rappels. (traducción alternativa)
