Resumen: (traducción alternativa) Rappel canyon in the conglomerate. At the top there are still some narrow sections with lots of blocks to climb.			
Hidrología: (traducción alternativa) Hardly any catchment area, so not much flowing water, but surprisingly deep pools.			
Acceso: (traducción alternativa) Leave one car in Zhonggou and take a car to the village north of where the hiking trail starts.			
Acceso: (traducción alternativa) About 800m up the mountain, on the plateau at the top it is best to stay on the path until you reach the dry streambed, and follow it until the first pools appear.			
Recorrido: (traducción alternativa) Very narrow at the top, you can't progress very quickly. Anchors need to be replaced. There seems to be a place in the middle where you need a headlamp. Vertical at the exit.			
Regreso: (traducción alternativa) Through the fields back to the car.

2026-01-30 Bibtore ⭐⭐⭐👉 📖 ⭐⭐ 🚣 ⭐ 🌊 Bajo 🚨 Salida de emergencia We got out relatively early as we had expected a quick and easy tour. However, all anchors had to be replaced, I was hungover, another had no neoprene with him... Although there is hardly any running water, you definitely need to come better prepared for the tour.
