Especialidades:

Equipo:
Cuerdas: 2x20m

Resumen: (traducción alternativa)
Gorge hike with smaller rappels and a "key passage".

Hidrología:

Acceso: (traducción alternativa)
On the Inntal freeway A 93 direction Kiefersfelden/Kufstein. Exit Kiefersfelden, after a good 1.2 km turn left at the T-junction (direction town center and Kufstein) and after 450 m on Rosenheimer Straße turn right at the next traffic light into Thierseestraße. Now drive 3.1 kilometers (from the traffic lights) - narrow-gauge tracks alternately accompany the road - until a road branches off to the right up to Breitenau. Here we go up to the right, past the farmhouses on the left, the tarred road becomes a dirt road, on the left below is the Schopperalm and we stop at a fork in the road, 2.7 km from the fork in the road. At the fork we see yellow signposts ("Rechenau" or Hintere Gießenbachklamm"). Here we park the vehicle.

Acceso: (traducción alternativa)
An indistinct track leads down through the forest in a westerly direction to the wide gravel bed and the slide brake at the beginning of the gorge.

Recorrido: (traducción alternativa)
Entering below the slide brake, after a few slides, you soon come to the key section of this gorge. First you rappel twice, each time a few meters into whirling pools, and then on the next rappel you have to try to rappel under the surge, crouched flat against the rock, and not be pushed into the corner ("Gscheier Loch").

Regreso: (traducción alternativa)
After the gorge has opened, turn left onto a forest road. This would bring us to the Schopper Alm, but we cross at the latest on the open meadow area pathless or on unclear tracks up to the forest road. Here to the left a few hundred meters to the car.\nAlternatively, below the Schopper Alm a continuation of the tour in the Vordere Giießenbachklamm is possible.

Coordenadas:
Inicio del Cañón 47.6232 12.1240
Final del Cañón 47.6211 12.1251

There's still quite a bit of dead wood in the lower section, but otherwise it's pretty normal. Unfortunately, the lower section is still closed due to a landslide. (traducción alternativa)

All good, pretty low water level. Instead of hiking out and back towards the lower part through the biergarten we just followed the river for a bit until you reach the bridge, then circle around the lake to the lower part. Much nicer, didn't take that much longer and don't need to walk through the biergarten or fields with cows in them. Much better in my opinion.

Anchors in the upper part old but ok. New anchors after the high rappel. Quite pleasant water temperature. (traducción alternativa)

Great tour for exhibitionsts if connected with lower part. Walked through a restaurant in wetsuits :-) Stands all ok, some jumps possible after checking. The crux is not to be afraid thanks to intermediate and is a lot of fun to rappel through.

2025-06-13 | Joey CIA | ☆ ☆ ½ |🕮 |⚓ ★ ★ | ≋ Normal | 👍 Completado
Middle part nice and with some slides, stands ok. Lower part again reasonably deep so that jumping and slides were possible after checking. Rusty stands but still ok. (traducción alternativa)

All stands in order, water already surprisingly "warm". At the "Gscheier Loch" there is the possibility of attaching an intermediate stand or deflection. Chain anchor on the right. (traducción alternativa)

All good

2024-05-12 | Montie | ☆ ☆ ☆ ☆ |🕮 |⚓ ★ ★ ★ | ≋ Normal | 👍 Completado
Anchors in good condition, great tour. Waterlevel at 2,5 m3/s @Bleyerbrücke (Kieferbach). At the upper end of "normal" waterlevel, but no problems.

2023-08-21 | Patrick Summerer | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | ≋ Normal | 👍 Completado
Well secured with chain stalls, partly right and left! No jump or slide possible because pool full of debris. (traducción alternativa)
