Clasificación: ★ 3.9 (18)	Información: ★ 2.9 (15)	Belay: ★ 2.9 (15)
Especialidades:		
Equipo: Cuerdas: 1x40m		
Resumen: (traducción alternativa) Very dangerous/life-threatening at higher water levels (unstable weather); very beautiful half-day tour; best sunshine from midday; water drainage in the upper part by the "Enel" power station, therefore usually little water in the canyon; several bolts for traversing rope construction available; it has often happened that water has been drained into the canyon unexpectedly. The rappels then become really challenging!		
Hidrología:		
Acceso: (traducción alternativa) see coordinates		
Acceso: (traducción alternativa) On foot (approx. 30-40min): Directly next to the exit at the Enel power station, follow the pipeline up steep steps through the tunnel (a lamp is not absolutely necessary). After the tunnel, the path is flat until you reach the equalizing basin. Once you reach the basin, an iron footbridge leads over the concrete obstruction. Then bypass the basin on the left. Before the next iron bridge/stream, look out for the canyoning markings on the tree to the left (blue dot on a white background). From here, follow the markings through the forest. By car (20min drive one way!): From the cemetery, walk down the hiking trail to the stream in a few minutes --> entry at approx. 500Hm before the stone bridge right.		
Recorrido: (traducción alternativa) The tour begins with a car transfer at the stone bridge at approx. 500m in the streambed and leads for approx. 20-25min through open terrain. In this part you pass the "Enel" water drainage after about 10 minutes (most of the water is diverted here). The wall can be downclimbed on the right-hand side. If accessing on foot, the tour begins shortly before the first abseil point (35m, orographic left, rope traverse possible). After this highest point, the next rappel follows immediately (10m orographic right). Then there are some small steps and pools in open terrain before it cuts in for about 100m in the middle section (no lamp necessary). After an inflow from the left, you have a short stretch to the next 3 abseils, which are interrupted by short walking passages. At the end, the canyon narrows again briefly.		
Regreso: (traducción alternativa) The exit of the canyon is directly at the Enel power station before the bridge right at approx. 380Hm.

Informes:

2026-04-30 | Clarissa Linder | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Normal | 🟢 Completado

Access was super easy to find thanks to the many blue markings. The water level is currently very relaxed. (traducción alternativa)

2026-04-08 | Péter Bonczi | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Alto | 🟢 Completado

An exciting and beautiful tour. The approach signs are clear. Thank you. Equipment OK. Plenty of water from the start still. Especially from side branch influence, but manageable. On the penultimate swim in the pool, it is advisable to pay attention to the underwater. (traducción alternativa)

2026-03-21 | Horst Lambauer | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Alto | 🟢 Completado

I have re-marked the access path where the markings were gone. At the moment, all the water is still being let through the canyon because the power station is out of order. This makes the canyon quite sporty because you have to rappel directly into the water a few times. But mega beautiful and fun for advanced climbers. (traducción alternativa)

2025-12-05 | Horst Lambauer | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Alto | 🟢 Completado

Really nice this year because they let the water in from the power station. Some of the water levels are quite sporty and tend not to be for beginners. All stands tip top (traducción alternativa)

2025-10-17 | Florian Heufler | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Alto | 🟢 Completado

During the ascent, the siren of the power plant suddenly sounded, after consulting with power plant employees who happened to be present, it turned out that the siren goes off every hour today due to a malfunction, Anchorages all ok, from the inflow onwards the amount of water increased considerably but everything was stress-free to walk on (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Frondizzon Petit gros débit. L'équipement permet d'éviter en partie le jet dans les cascades mais probablement pas avec beaucoup plus d'eau. Vu du pont d'arrivée c'est pas facile à jauger, l'idéal étant de remonter jusqu'au dernier ressaut. Magnifique et assez court avant de prendre la route (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21759/observations.html>)

2025-09-28 | Patrick Summerer | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Alto | 🚨 Salida de emergencia

Since we already had a sporty water level at the 35m waterfall, it was already late afternoon and there would be about 1/3 more inflow from the inactive hydroelectric power station, we decided NOT to enter the lower part. We made an "emergency exit" after the scree break orographic left steeply through the forest up the 70 meters back to the access path on the ridge. Once back down, we took a closer look at the exit and climbed up the first pools to see the water level in detail. The canyon would probably have been doable with this water, but if in doubt, it would have been better to take the defensive option ;-) (traducción alternativa)
