<b>Especialidades:</b>		
<b>Equipo:</b> Cuerdas: 2x30m		
<b>Resumen:</b> (traducción alternativa) Worthwhile little vertical open lime canyon; many small slides and steps; in good weather and suitable water level suitable for children or beginners; several exit options; mostly single pitons or glued anchors (with Bauhaus links); emergency drill kit recommended; some hidden stones in the pool; in sunshine beautiful yellow/green shimmering pools; poor cell phone reception.		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) From Mondsee drive in the direction of Unterach/Bad Ischl, then turn right towards Weißenbach am Attersee. After the campsite in Weißbach, turn right towards Bad Ischl and follow the B153 to km 6.2. Either park immediately on the right in the forest road next to the cycle path (little space) or continue for about 100m and park in the large parking lot to the left of the main road.		
<b>Acceso:</b> (traducción alternativa) First follow the overgrown forest road that leads directly into the sparse forest at km 6.2. After a short time, the forest road turns into a path that now leads more steeply uphill through the forest and after a few meters in altitude meets the old forest road again. From here you follow the old forest road with only a slight incline (partly more like an overgrown path), which meets a new forest road after about 15 minutes (large open area). Follow the new forest road to the right for only a short distance until you reach the entry point at approx. 740m (it doesn't matter much, but the Hinterer Stehrergraben entry point is not before, but after the bends).		
<b>Recorrido:</b> (traducción alternativa) With its open gorge character, many slides and small abseiling steps, the Hinterer Stehrergraben is certainly one of the most rewarding beginner gorges in the Salzkammergut, alongside the Burggrabenklamm. Depending on the participants, weather and time of year, a 3mm neoprene may be sufficient. The canyoning tour never gets boring as the walk, slide, rappel and downclimb sections alternate well. A higher cascade in the middle of the canyon of approx. 16m can be bypassed via a fixed rope on the right. After a few slides, another 16m step follows, which can also be slid from the middle after checking. This is followed by smaller walking, sliding and downclimbing sections before you finally reach the highest, clearly visible abseil point (10m+20m). After the last small 3m step (possibly a jump), you leave the stream on the right at approx. 540m.		
<b>Regreso:</b> (traducción alternativa) Through the forest to the main road and right back to the parking lot.
