Longitud del cañón: 300m	**Rapel más alto:** 19m	**Cantidad rapells:** 6
Transporte:	**Tipo de roca:**	**Zona de entrada:** km²
Temporada:	**Orientación:** Este	**Mejor época:**
Clasificación: ☆ 4 (6)	**Información:** ★ 2.6 (5)	**Belay:** ★ 2.6 (5)

Especialidades:
Regulado,

Equipo:
Cuerdas: 1x40

Resumen: (traducción alternativa)
Watery alpine canyon

Hidrología:

Acceso: (traducción alternativa)
From Auzat to Marc. We park our car in the parking lot at the entrance to the town.

Alternatively:
Drive through the town and continue for about 200 meters. Park just before the “Marc (exit)” town sign.

Acceso: (traducción alternativa)
We continue along the road until we reach the hairpin curve. There, we take the path that runs along the orographic right bank through the forest. We rejoin the road and, about 100 meters further on, descend to the right into the river.

Alternatively: about 10 min
Simply follow the road until you reach a house on the left and see a stone wall on the right.
Here, follow the clearly visible trail marks down to the stream.

Recorrido: (traducción alternativa)
A short, very well-maintained aquatic tour that is also offered by many tour operators.
After a short river walk, it begins with a 3-meter jump. This is followed by the highest rappel/jump—a 20-meter rappel that can also be jumped from the right side (about 15 meters).
This is followed by a 5-meter rappel, a 6-meter jump, and two more small jumps (the last one right next to a house in the village of Marc), before exiting the canyon on the right.

Regreso: (traducción alternativa)
After the last jump, head directly right up to the street.

Coordenadas:
Inicio del Cañón 42.7167 1.4437
Final del Cañón 42.7167 1.4481
Aparcamiento Entrada y Salida 42.7154 1.4488

Automatisch importiert von Descente-Canyon.com für Canyon Marc T° douce voire très bonne. En encadrement j ai laissé tombé mon sac de premiers secours au départ de la tyrolienne...(Une première en 35ans d encadrement pro...) Une fraction de seconde et mon sac Artiach orange s est fait la malle. Revenu j ai sondé l actif sous la tyro. La cavité est encombrée d une grosse branche fichée tel un pieu. Glauque harpon. Rien. Sous et après la cascade : rien...2 containers pour gérer du secours et situation d attente, un masque, une seconde poignée ascension mais surtout ma radio et clés de voiture...si quelqu'un...merci ! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/269/observations.html)

A very nice, short canyon with lots of jumps. The highlight is the 15-meter jump. Clear water. A quick round trip by car in 50 minutes without rushing. I've updated the description to reflect current conditions. (traducción alternativa)
