Resumen: (traducción alternativa) Alpine forest gorge for rappeling		
Hidrología:		
Acceso: (traducción alternativa) From Imst on the B189 in the direction of Fernpass past the hamlet of Dollinger to the industrial park on Miemingerstraße house number 60 (6.5 km from the traffic circle at the northeast end of Imst - see directions sketch in the photo gallery). Here we park our car on the right side of the road in a suitable place. with a second car we drive back on the main road in the direction of Imst, where we turn right up in Tarrenz and head for Obtarrenz. We continue uphill to the Kappa cross (signpost "Peregreithalm - Sinnesbrunn"). After a conversion distance of 9.4 km - the last kilometers on unpaved forest road - we come to Klammenbachl (see conversion in photo gallery).		
Acceso: (traducción alternativa) Along the rappel, if necessary already in the creek, it goes downhill to the first rappel. An access without rappel is described in the book by Riml/Amor (see also map section in the photo gallery).		
Recorrido: (traducción alternativa) At first relatively open streambed. At about 1200m altitude a forest road crosses the stream. Here you can get on or off before the more alpine part (the path to the right takes you to Obtarrenz). The 2nd part follows with about 25 more rappels, partly in a strongly incised streambed.		
Regreso: (traducción alternativa) Get off at the road bridge and cross the road to the car.

The middle/lower, incised section is worthwhile if the water level is appropriate. In the narrow part, note the necessary intermediate belay (8m) before 25 m rappel, as described in Riml's topographic view. Lower part: lots of climbing with loose rock and scree. (traducción alternativa)

Upper part dry (up to abseilstation 24/ guide Riml&Amor), then low. Stands all OK (partly only one BH). (traducción alternativa)
