Main running canyon in the streambed About 3 cool rappels Not really worthwhile, compared to the lower part "chli Schliere" which has many super cool slides and can be called a real canyon. (traducción alternativa)

Similar experience to the trip on 19.06. We walked from the lower Chli Schliere parking lot. River Right to the Chli Schliere entry and then over the bridge to the other side. Here a hiking trail is marked on the Swiss topographic view over an open field (Gärtli on the map). The path to the alpine pasture above at 966 is a gamble. (traducción alternativa)

Very slippery, anchors are in good condition except for C18 we improvised with a tree. (see picture) (traducción alternativa)

The inspection was superiore... is good if you want to stay in the canyon all day... A lot of walking at the beginning... but then it goes on nicely... Highlight is the tunnel and then the 80m rappel or with intermediate 30+50m Water reference value Chlie Schliere on the day was 140l/s at the rappel C18 - new anchor drilled, the old one was loose... unfortunately we couldn't pull it out completely. maybe next time take a flex with you and replace it with the temporary rapid link. Do it once to complete your day in the area, but the descent is not exceptional. The tunnel is the most interesting part! (traducción alternativa)
