Equipo: Cuerdas: 2x30		
Resumen: (traducción alternativa) One of the most beautiful canyons of northern Italy. Long and very narrow gorge in beautifully eroded limestone with continuous waterfalls that are mostly rappel in the water jet. Some jumps and slides. Above are several large towns that used to discharge all their sewage into the gorge. The water quality is now (2022) much better, but still not perfect. Safe weather necessary as there are only two escape options after 3/4 of the gorge.		
Hidrología:		
Acceso: (traducción alternativa) From Lago d'Iseo on the SS42 northward to Piamborno or from Edolo southward on the SS42. In Cogno we head for the large parking lot in Via de la Fonte 27 next to the sports field. There we park the car for the exit. With the second car we go up towards Malegno and Ossimo inferiore, from where we follow the signs for the Santuario SS Annuciata. At a road junction with a crossroads on the right turn left towards Le Vigne and park in front of the next road leading down (space for 3 cars).		
Acceso: (traducción alternativa) From below: From the parking lot, head towards the gorge exit and follow the trail on the orographic left side of the gorge until you reach the stream. Once you are on the streambed, briefly through the streambed down until you are in front of the gorge entrance. Trails are correctly marked in the OSM, map also on * http://www.tntcanyoning.it/images/immagini/canyon/trobiolo/mappatrobiolo.jpg Access from above: Follow the road with driving ban down, then on a good hiking trail to the bridge over the streambed, here still about 5min through the streambed to the gorge entrance.		
Recorrido: (traducción alternativa) 22 rappels in narrow gorge without many walking passages in between. A few jump and Rustchmöglichkeiten. Rappels are regularly in the rappel. After about 3/4 of the gorge, old wire ropes and a path hewn out of the rock lead out to the right. Up to here the anchors are OK, from here worse insurances. First it goes down in a narrow gorge, after a half-cave formed by a huge clamping block (path above the block) there is a last escape possibility to the right. After that, a landslide and about 3 more rappels.		

Regreso: (traducción alternativa)

Exit to the left immediately after the last rappel
