Clasificación: ★ 3.9 (3)	Información: ★ 3 (2)	Belay: ★ 2.5 (2)
Advertencias: <i>Piscinas secas: Caldera trampa (Marmita trampa)</i> Piscinas que no tienen agua o cuyo nivel no llega al borde de la piscina. Por lo tanto, salir puede ser imposible o, al menos, difícil.		
Especialidades:		
Equipo: Cuerdas: 1x30m + 1x40m		
Resumen: (traducción alternativa) Rappel canyon, without water flow in summer		
Hidrología:		
Acceso: (traducción alternativa) Lower parking lot: We drive north on the A-138 from Ainsa in the direction of Bielsa. We come via Labuerda and Escalona to the bridge over the Rio Yaga, where the Miraval canyon exits - 17 km from Ainsa, town center. We pass the hamlet of Hospital and 450 m after the bridge over the Rio Yaga we turn left at an acute angle uphill towards Tella, Revilla. We drive steadily uphill, leave the turn-off to Tella on the right after 5.7 km, continue towards Revilla and after a further 4.9 km come to a sharp right-hand bend, on the left-hand edge of which there is a large open space to park our car. From here it is another 0.9 km to Revilla. Upper parking lot: Continue on the road for another 900m until you reach a parking area in a rightward hairpin bend (several information boards)		
Acceso: (traducción alternativa) From the serpentine we then take the path that leads roughly horizontally to the NNW and a few minutes later we are at the streambed.		
Recorrido: (traducción alternativa) 18 rappels, some of them jumpable. In summer some Marmitas Trampas, the final abseil in the free slope down to the path that leads right to Escuain and the garganta of the same name.		
Regreso: (traducción alternativa) After the aforementioned final abseil, turn left onto a good path and follow it up to the road and your car.		
Coordenadas: Inicio del Cañón 42.5979 0.1403 Aparcamiento a la entrada 42.5977 0.1421 Aparcamiento a la salida 42.5927 0.1539 Final del Cañón 42.5949 0.1378

Automatisch importiert von Descente-Canyon.com für Canyon Consusa (inferior) Fait l'intégrale. Débit correct dans l'inf, la grotte est en eau. Super condis, seuls... (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20963/observations.html>)

2024-03-21 | GeorgB |★★★★|📖★★★★|📍★★★|🌊 Alto |👍 Completado

Melting snow with high but easily manageable water levels. All anchors available. Be careful when jumping, not all pools are clean and the white water hides obstacles. (traducción alternativa)

2024-03-21 | Rok |★★★★|📖★★★★|📍★★★★|🌊 Alto |👍 Completado

Currently superiore water level, as the snow above is melting. Absolutely recommendable and the stands are very good. Almost always 2 anchors. We carried the tree trunks down on the last rappel, as they hang very dangerously on the edge. Has a bit of a Lodrino feeling in between. Top canyon when it has water. All the pools are full to the brim and no problem getting out. (traducción alternativa)
