<b>Advertencias:</b> <i>Too much water flow in the receiving water</i> There is the situation that the water flow in the canyon descent is fine, but the canyon then flows into a receiving stream that carries too much water and this dangerous predicament cannot be avoided (e.g. in the side canyons that go into Balcés Estrechos, e.g. Barranco Pallas, see also 2 pictures

Short tour with cool jumps and a fantastic final waterfall. (traducción alternativa)

Nice tour with quite pleasant water temperature. Stands all ok. Super final waterfall (Waterfall of Love) which leads into the Osumi River. Check the water level here. On our ascent it was low, so you could easily float or walk to the exit point. Combined with Bigasit, a great day of canyoning! (traducción alternativa)

Short but very beautiful. The arrival between the massive walls of the osumi river and the short passage to the exit are well worth it. Water level in the osumi river is low. (traducción alternativa)

Unfortunately very little water. Only a pair of neoprene pants will do.... Nevertheless, even though the tour is very short, we really enjoyed it. (traducción alternativa)
