Resumen:
Easy introductory tour a 30' bike ride from Scharnitz and with less compromise. The bigger abseils (max. 25m.) have double, recent anchors (2022-2024). The smaller, often downclimbable passages have either 1 bolt or 1 abalakov as aid. Not aquatic, nore technical and mostly very sunny, could be done in 1/2 wetsuit or in summer without. Phone reception at exit and on the approach.

Hidrología:
Snowmelt, rainfall and karstic sources at the start and end of the canyon. Runs all year quietly.

Acceso:
30' bikeride (access allowed 1/4-31/10) + 30' approach on the orographic right bank.

Acceso:
Park the bike by the bridge and hike up orographic right. The trail takes a wide turn to the left and away from the canyon (do not mistake it for smaller animal trails) and comes back to the canyon gradually through small bushes and pine trees. The trail is not marked but is rather obvious in its upper part.

Recorrido:
The tour starts/end well protected with a higher abseil.

2 bolts L 14m to foot of the waterfall

After the heavy rain the canyon was in normal condition & full in the sunshine. Snowy mountains in the front & back. Without the beauty of the Karwendel the canyon would be rather secundary, nothing technical. Interesting though as introductory tour to the region or the aspect of Abalakovs (style in which the canyon was opened). Added quicklinks, only 1 is missing (near the end).

Added (double) anchors where previously there were none, also added more abalakovs to take away some of the exposure in the downclimbs. Would be great to add quicklinks for all 7 abalakovs.

Possible thunderstorms didn't allow for time to complete the anchors, just a quick visit to the canyon. Water levels seems rather stable throughout the year.

Having done all tours in the area, i was curious about the smaller canyons that are nowhere described. To my surprise there was no anchors, i completed the tour on abalakov or downclimb.
