Resumen: (traducción alternativa)

Short but beautifully washed out gorge with a few abseils over artificial steps.

Access is not always intuitive, so it is better to have the Tabacco map of the area with you, to get your bearings. It is advisable to wear a climbing harness and helmet during access, as the descent to the riverbed via a rappel in the forest.

Hidrología:

Acceso: (traducción alternativa)

From Forni di Sotto, drive towards Forni di Sopra on the SS52, after about 3.7 km turn left onto the road that leads to the "Ristoro Agriturismo la Palote", where you can park.

Acceso: (traducción alternativa)

From the parking lot, continue on foot to reach the riverbed of the Tagliamento along a forest path, then cross the river using a bridge.

Continue uphill along the banks on a forest path until it ends, passing the end point of the tour where you can check the water level.

At the exit of the forest path, enter the forest and continue towards our route (to the east) until you find the path that climbs steeply near the first rock walls (to the west).

Follow it again in the direction of our route, underneath the rock faces, until you walk high above the stream.

Continue climbing until the path moves away from our canyon

(see Tabacco map). At this point, the path continues upwards, where you have two options

A) Reach a first clear dry tributary (altitude approx. 995 m) (marked on the Tabacco map)

and descend carefully to some rocky outcrops and trees, from where we descend to the riverbed (about 60 m).

This descent leads to the riverbed above the third rappel.

B) From the first tributary, continue along the slope, looking for the best route on steep terrain to reach the next dry tributary (marked on the Tabacco map). Choosing the best path

path and climbing up and down, you will cross a small streambed and then reach a

second, larger streambed (at an altitude of approx. 988 m), from which you descend (approx. 100 m) over trees

rappel down to the bed of the tributary stream marked on the map. As soon as you are in the tributary stream,

you can easily reach the

riverbed of our route.
