Resumen: (traducción alternativa) dark gorge		
Hidrología:		
Acceso: (traducción alternativa) Leave the city center of Grenoble via the Isère to the NNW and head for the suburb of St-Martin-le-Vinoux on the D 57 (also possible from St Engrève). Now head uphill towards Quaix-en-Chartreuse. About 1 km before this village, the road bends sharply to the right across a side valley of the Vence. Immediately afterwards, park in the excavation pit on the left.		
Acceso: (traducción alternativa) A few meters back on the road, then a dirt road between forest and meadows descends in a south-easterly direction. On a flat saddle, before the path climbs again, an inconspicuous track runs off to the left (south-east) into the bushes. Follow this - steeply at the end - down to Vence and the entry to Infernet.		
Recorrido: (traducción alternativa) The difficulty depends crucially on the - usually quite decent - water flow. Although the stands are usually set up to avoid the jet as much as possible, access to the stand above the 25 m rappel is quite exposed. Whirlpools and rollers then pose a further danger. Video and photos show a low water flow! At times (!) a guide rope was fixed to the right wall, which could be used to stay out of the powerful jet. But then about 40m abseil length above intermediate level. Good to connect with Alloix.		
Regreso: (traducción alternativa) After the canyon exit, before the water catchment, turn right up to the aforementioned saddle and from here back to the car.

High in this flow, we used the high entrance. We used ropes in some places to approach the anchors for the safty lines. Strong and dangers flow in some places. Good team, extra gear (drill, floatingbag) and prior knowledge of the canyon needed. For most teams it's safer to turn around. Water level photo is taken at the entrance of the canyon.
