Resumen: (traducción alternativa)
Rappel canyon down to the Vesubie

Hidrología:

Acceso: (traducción alternativa)
On the N 202 from Nice in (northern) direction Digne. After 20 km, turn right and continue on the D 2565 up the valley of the Vesubie, not quite 10 km, until just before the village of St Jean la Rivière, the D 19 branches off at an acute angle. It leads us up to the village of Duranus (5 km after the turnoff). A little further down over the bridge, you will find space to park the car in the next left turn.

Acceso: (traducción alternativa)
Back to the road bridge and down on the right to the first rappel (10 m) into the stream.

Recorrido: (traducción alternativa)
About 5 rappel, slide and possible jumps

Regreso: (traducción alternativa)
The exit is about 100 m before the canal with plenty of water crosses the Vallon de Duranus. From the canal, a path leads up the orographic left flank to the D 19, which you follow to the left for 900 m to the car.

You could also follow the path down to the D 2565, but it is not advisable to move vehicles, as parking on the D 2565 is extremely limited in the narrow canyon here and there is also a risk that the parked car will be broken into by the time you return.

The Vallon de Duranus can be combined with the neighboring Vallon de L'Imberguet due to the short time required.
