Especialidades:

Equipo:
Cuerdas: 1x20m, 2x35m

Resumen: (traducción alternativa)
Largely open stream, short descent.

Hidrología:

Acceso: (traducción alternativa)
1.6 km from Col de Vizzavona on the T20 (former N193) in the direction of Ajaccio we can park our car on a larger parking area on the right of the road. If we have only 1 car available, it is recommended to park the car about 200m further in the next left turn.\n\nA second car we would have to park if necessary 2.2 km further at the junction of a dirt road to the north, about 750m after the road bridge over the Gravona (Pont de Sellola).

Acceso: (traducción alternativa)
From the parking lot directly into the stream, from the alternative upper parking lot on a forest path in a northeasterly direction (see sketch in the photo gallery).

Recorrido: (traducción alternativa)
After own meters of walking and descending the C11 chute not quite easy with large water flow. Only at the end of the tour again an attractive rappel (C31), which can be avoided if necessary by an exit to the left.

Regreso: (traducción alternativa)
So only 1 car is at the top, after the C31 and a small jump left out and steeply up to the ridge above the stream. Then along the ridge to the road and to the car.\n\nIf there is a second car at the bottom, we get out of the creek a little later and there we meet a path on the left, which we follow to the bridge over the Garona (next to the railroad bridge) and then beyond the railroad track further to the lower car (see sketch in the photo gallery).

We had a lot of water. A few days earlier we had already walked with less water. Great fun with WW experience in lots of water. Completely unsuitable for beginners when there is a lot of water Video (Extem water from minute 10:36, with less water see from minute 1:39): https://youtu.be/fYYt3V1HECE?si=3q7AA07KhAeMLDg2&t=636 (traducción alternativa)
