See Francesco's description. At normal water levels, the second descent is suitable for diving; exercise caution during periods of higher flow (the rigging isn't set up very well). (traducción alternativa)

A canyon with some short, interesting sections; 3/4 river trekking. Suitable for beginners. A few dips here and there... 2 rappels... the first anchor is high up on the right on a tree to enter the famous Farsora waterfall. The second is above the swirling pool (traducción alternativa)

At the Farsora waterfall there were no weapons so we installed cordon+maillon on tree on right bank. In the next passage it would be good to fractionate in the hanging bottleneck about 8 meters downstream of the installed nat. The second rappel is in the second bottleneck (about at elevation 560) and needs to be completely re-installed (single old and spinning limb). In this meander be careful not to dive into the puddle as the flow can cause dangerous plating. (traducción alternativa)
