

Rio Trementina

Crear: 2024-11-11 14:31:32	Actualizar: 2025-07-10 07:25:23	Imprimir: 2026-04-04 05:04:02
País: Italia / Italy Región: Trentino-Alto Adige Subregione: Trento / Provincia autonoma di Trento Ciudad: Terre d'Adige		
Dificultad: un poco difícil	Grado: v4 a2 III	Tiempo total: 3h55
Tiempo acceso: 50min	Tiempo tour: 3h	Tiempo regreso: 5min
Altitud de entrada: 550m	Altitud de salida: 200m	Altitude delta: 350m
Longitud del cañón: 500m	Rapel más alto: 50m	Cantidad rapells: 16
Transporte: A pie	Tipo de roca:	Zona de entrada: km ²
Temporada:	Orientación: Este	Mejor época:
Clasificación: ★ 3.5 (1)	Información: ★ 3 (1)	Belay: ★ 2 (1)
Especialidades:		
Equipo: Cuerdas: 2x50		
Resumen: (traducción alternativa) Basic data		
Hidrología: (traducción alternativa) Recommended after rainfall, otherwise dry. The amount of water normalizes very quickly even after heavy rainfall.		
Acceso: (traducción alternativa) Approach: North of Trento, park in Zambana vecchia.		
Acceso: (traducción alternativa) Parking entry: on foot, take the underpass near the church. Turn left, following the signposts to 680 foigen. Climb up the steep path to a fork at 410 m (Molinel); keep left (signpost Lamar- Val Trementina 681). After this fork we cross a first stream near a fence, a second (Rio della Netta) and the third is ours (Rio Trementina).		
Recorrido: (traducción alternativa) The slope north of Trento (east side of the Paganella summit) is apparently inaccessible and ugly: in 1955, a landslide destroyed a large part of the village of Zambana and the Zambana-Paganella cable car station. From a canyoning perspective, however, lines and routes can be guessed; after heavy rainfall, the waterfalls gush out everywhere. The Val Trementina begins at an altitude of 1550 m, at the foot of the vertiginous east face of the Paganella, and runs straight down to an altitude of 200 m, north of Trento. Here we suggest the lower part, which is logistically the most impressive. There is a middle section from an altitude of 1000 m, with old but good belays), and an upper section (from an altitude of 1700 m, set up expedition style in 2023) The lower part begins with easy downclimbs. After the third belay, the canyon narrows and becomes steeper. The Netta stream (also drilled in) joins. Continuous waterfalls follow until the end.		
Regreso: (traducción alternativa) Exit: after the 50 m abseil, turn left into the forest and in 1 minute you are in the open fields. Follow the open path to the left until you reach the small asphalt road that leads to the village.		
Coordenadas: Inicio del Cañón 46.1534 11.0652 Aparcamiento Entrada y Salida 46.1588 11.0719 Final del Cañón 46.1520 11.0718		

Informes:

2025-07-08 | Bina | ⭐⭐⭐ | 📖⭐⭐⭐ | ⚓⭐⭐ | 🌊 Normal | 👍 Completado

Today, after the 2nd thunderstorm, we surprisingly had water. The canyon has many beautiful spots, but is a pure rappel canyon, which is very rewarding with water. Unfortunately, there are no entries on various platforms, so we dragged the drill along in vain. (traducción alternativa)

Despite thunderstorms the day before, no water... (traducción alternativa)
