País: Schweiz / Switzerland Región: Kanton Graubünden Subregión: Region Surselva Ciudad: Vals / Vals Platz		
Dificultad: difícil	Grado: v5 a5 III	Tiempo total: 7h10
Tiempo acceso: 1h30	Tiempo tour: 5h30	Tiempo regreso: 10min
Altitud de entrada: 1820m	Altitud de salida: 1180m	Altitude delta: 640m
Longitud del cañón: 1200m	Rapel más alto: 45m	Cantidad rapells: 30
Transporte: A pie	Tipo de roca: slate	Zona de entrada: 8.00km ²
Temporada: agosto - octubre	Orientación: Oeste	Mejor época: 8-14 Horas
Clasificación: ★ 3.5 (1)	Información: ★ 2 (1)	Belay: ★ 1 (1)
Especialidades:		
Equipo: Cuerdas: 2x50		
Resumen: (traducción alternativa) Aquatic rappel canyon Almost all rappels in the water jet		
Hidrología: (traducción alternativa) The stream constantly carries a lot of cold water. Even after 3 weeks without rain. It is fed by many springs		
Acceso: (traducción alternativa) Coming from Ilanz, take the main road in the direction of Vals. After the small village of Lunschana, park immediately behind the next gallery on the right-hand side. The second car or a bicycle can be parked further up the road. This parking lot is located after a series of galleries just after the main road crosses the Vals Rhine, also on the right-hand side. You can see the water level from the main road if you follow it for another 200m.		
Acceso: (traducción alternativa) From the lower parking lot, cross the road and follow the forest path for about 50 m. The hiking trail to Alp Rischuna then turns off to the right. Follow this path up to an altitude of approx. 1910m. After the path crosses a rocky ledge, turn right onto a poorly visible hunters path. This leads steeply through the forest to the entry point.		

Recorrido: (traducción alternativa)

At the beginning, the stream is more horizontal with only occasional rappels. This gradually changes as the stream becomes more vertical and there are no more walking passages between the rappels.

Although the stream seems rather open, it always cuts into the rappels so that you have to rappel in the water.

The rappels are nicely cut in and usually have an intermediate pump. The two high rappels with Gysir each have their rappelling routes on the orographic right-hand side.

Regreso: (traducción alternativa)

After the last rappel through the forest to the Vals Rhine, cross it at a suitable point and climb up to the road on the other side.

Well, you can do that. It's much more sporty than it looks at first glance. From 1800m to 1400m there are rather few anchors, so it doesn't hurt to take more with you. (traducción alternativa)

Primer descenso: 01.08.2019 en Reto Bubendorf und Nico Schneider (oberen 350 hm), die unteren 200hm waren schon von Timo Stammwitz eingebohrt
