Especialidades:
Presa (descarga autom.),

Equipo:
Cuerdas: 2x 50m

Resumen: (traducción alternativa)
A canyoning gem in the Kandertal valley near Reichenbach. A short but beautiful and rewarding descent.

Hidrología: (traducción alternativa)
Telephone number hydroelectric power station: +41 58 477 84 95
Do not underestimate the amount of water in this canyon and the warnings about the danger of sudden floods!

The water level must be assessed above the intake. At full capacity, 1,5000 l/s are turbined. In the event of an automatic shutdown, this amount of water can also be expected in the canyon...

Acceso: (traducción alternativa)
Approach via A8 exit 19 in Spiez and continue in the direction of Kandersteg. In Reichenbach turn left towards Kiental. The parking lot is located directly after the bridge over the Spiggenbach. The equipment can still be reached by car about 1.3 km in the direction of Griesalp to the Spiggengrund junction.

Acceso: (traducción alternativa)
Walk along the road toward Spiggengrund for about 1.7 km until you reach the first bridge over the Spiggenbach, just past the dam.

Recorrido: (traducción alternativa)
Along with the Gries and Gamchi canyons, the Spiggenbach is a canyoning gem in the Kandertal valley near Reichenbach (Bern/Berne/Berner Oberland). The canyon is scenic, and the rappelling sections are a fun challenge. Caution: Do not unclip too early under any circumstances! In several places, there were two steps down—this also applies to C32!

Warning from the power plant operator: Staying on or in the streambed below the water intake of a hydroelectric power plant is dangerous. If a technical malfunction occurs at the power plant, the water level can rise suddenly. The danger lies in the fact that this so-called surge cannot be prevented or predicted in advance. It is also independent of weather conditions.
Power plant number: 0848121175 (new as of 2026: +41 58 477 84 95)

Regreso:

Coordenadas:
Inicio del Cañón 46.5781 7.7446
Final del Cañón 46.5781 7.7362
Aparcamiento Entrada y Salida 46.5795 7.7293

It's best to call the power plant (+41 58 477 84 95—24/7 on-call service) beforehand, since cell phone reception isn't very good in the Kiental Valley! with Damian (traducción alternativa)

All the anchors are in good condition. Unfortunately, diving isn't allowed, but you can slide down the slide—though the pool doesn't have much depth. The water is a beautiful blue. (traducción alternativa)

Automatisch importiert von Schlucht.ch für Canyon Spiggebach, Wasserstand: "DC" Verankerungen: "Ok" Schön zu begehen. Die Telefonnummer auf der Tafel und im Swiss Alps Canyoningführer für Hydrologische Auskünfte führt in der Regel nur auf eine Infoschleife, die für Canyonisten nicht zielführend ist. Bei der Wasserfassung ist ein Schild mit der Nummer 058 477 84 95 angebracht, dies ist der Pikettdienst des Kraftwerkbetreibers. Hier kann und soll man sich vor einer Begehung Informieren. Immer Wasserstand vor der Wasserfassung beurteilen, diese währe aktuell recht sportlich. (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1268-spiggebach)

Automatisch importiert von Schlucht.ch für Canyon Spiggebach, Wasserstand: "DC" Verankerungen: "gut" Schlucht zu dritt begangen. Die Pools sind meist voll mit Kies, einige gehen zum springen, Kontrolle notwendig. Grosser Abseiler ergänzt mit zusätzlichem Stand. D14 queren rechts zum Lochüberhang. Dann sehr schön C30 ins grosse Becken... Aktuell guter gripp zum gehen. (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1268-spiggebach)

Alongside the Gries and Gamchi canyons, the Spiggenbach is a canyoning gem in the Kandertal valley near Reichenbach (Bern/Berne/Berner Oberland). The canyon is very scenic and the abseiling sections are a fun challenge. Caution: Don't tie out too early! In several places there were two steps down, this also applies to the C32! My 70m rope was twice as long everywhere. Approach via A8 exit 19 in Spiez and continue towards Kandersteg. In Reichenbach turn left towards Kiental. The parking lot is located directly after the bridge over the Spiggenbach. The equipment can still be driven about 1.3 km in the direction of Griesalp to the Spiggengrund junction. Follow the road to Spiggengrund on foot for about 1.7 km until you reach the first bridge over the Spiggenbach just after the weir. Never underestimate the amount of water in this canyon and the warnings regarding the danger of sudden floods! (see link to schlucht.ch for more details) Abseiling heights (estimated!!): C12, C15, C14, C28, C32 For details of the tour see https://www.christian-balla.de/Spiggenbach or video https://www.youtube.com/watch?v=phki8itowUA (traducción alternativa)
