The canyon is dry at this time of year; many trees are blocking the paths. Equipment is in very good condition (traducción alternativa)

Good flow. All anchors are in place and in very good condition. Cool and interesting sections. After the last rappels (red rock), about 150 m downstream, you can easily exit the canyon on the right side via a path (forest road). The path leads to the road, from which you can quickly reach the parking lot. (traducción alternativa)

The anchors are new, thank you, it's a pleasure. As I said, there are a lot of trees, but they're not too much of a hindrance to progress. We found a very comfortable exit on the right bank through the pastures, to confirm if it's a good idea or not. We also found a rope -> private message to retrieve it (traducción alternativa)

We did a short tour at night, in the middle you can downclimb a new C5 through a tunnel. We jumped in the red rock at the exit, but it's not particularly deep. (traducción alternativa)

The exit after the red rocks on the left is fine, at the top you can park in the bends. You can even balance over a tree trunk. (traducción alternativa)

Everything OK. Some trees but not problematic for the progression. Some garbage (rest of cars ?). We exit directly on the left after the last waterfall, when the rocks are becoming red. Steep and not comfortable. Seems that it is better 100m after.

Great if it has enough water. (traducción alternativa)

Canyon after it had fallen into oblivion. Not very long but nice for the area. Good to combine with another canyon in the valley. (traducción alternativa)
