<b>Resumen:</b> (traducción alternativa) Highly recommended; many rappels and some jumps possible; long, slippery canyon with cold, crystal-clear water; check the water level behind the inn before the tour; many rappels in the water; several deep pools; large clamping block in the lower third; emergency exit in the middle of the canyon (right); most of the sun at noon.		
<b>Hidrología:</b>		
<b>Acceso:</b> (traducción alternativa) From Torbole --> Riva --> Storo --> through long tunnel towards Albola mountain pass --> past Lago di Ledro and small villages --> straight on --> past Laghetto D'Ampola --> then turn left (Tremalzo) --> park your transfer vehicle at the Ampola Inn --> from here drive up the long mountain road and past the church of S. Croce church --> after about 1.5 km, at km 6.5 (closed from Nov. 1 to April 30), take the narrow road on the right (small group of houses) down to the bridge (entry 1125 m).		
<b>Acceso:</b> (traducción alternativa) Right at the bridge (with shuttle car) or without shuttle car on foot in about 1h15min walk up the old path behind the Ampola inn to the bridge (entry).		
<b>Recorrido:</b> (traducción alternativa) From the bridge to the 1st rappel point it is approx. 20min. in the streambed (slippery stones) --> now the first rappels follow immediately, which continue continuously --> numerous places can be jumped (exact assessment) or rappelled --> in between there are always walking sections --> many rappels can also be reached outside the watercourse rappel --> in between there are always walking passages --> many rappels are also outside the water flow and can only be reached by long exposed crossings (mostly fixed ropes) --> a striking point is a place with a huge clamping block under which you can rappel --> after that there are about 5-6 rappels (some also jumpable) --> the last rappel (12m) can also be jumped --> from this point it only goes over small flat slides and a short piece along the stream.		
<b>Regreso:</b> (traducción alternativa) The exit on the right leads through the forest to the open meadow and the inn (shuttle car) (740Hm).

Lots of snow, little ice, rock very slippery. Stands almost all freely accessible. Even some sun on access (around 12 noon at entry). (traducción alternativa)

Entry at the parking lot at 1150Hm. Reachable on foot from the inn in 1 hour. All belays are available several times. Nevertheless, take a good look, some new chain anchors have been torn out. The last part from exit 5 is probably often used commercially. Unfortunately still a bit slippery. (traducción alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Nero Fait avec navette, 20min de marche en rivière avant d'arriver au premier rappel. De l'équipement à foison, le plus souvent relai RG et RD. Certains sont neufs et normés, d'autres sont très fatigués, il faut bien choisir. Sorti à l'échappatoire RD après la cascade n°7 (sentier des guides, très confortable, en descente), on s'est pris un orage énorme non prévu. Le risque de crue n'est pas énorme dans ce canyon, mais le risque de chute de pierres est bien réel ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2606/observations.html>)
