Shuttle possible (usually no 4WD required).

Recorrido: (traducción alternativa)
After the first two rappels, a short river walk with a few more small rappels. The canyon is not very deep. About 300m before the arched bridge, the Izgaril flows in from the right.
In the descriptions under the heading "Babos+Izgaril" it is apparently assumed that below the confluence of these two streams the further common continuation now bears the name Izgaril. However, the open street map below the confluence shows "Perroi Babos", which would suggest that the name Babos is also retained in the common lower course of both streams.
After the old arched bridge (access and exit on a slope possible here), the highlight is the multi-stage drop into the deeply incised Lengarice Canyon (see description there).

Regreso: (traducción alternativa)
In Lengarice either - only if the water flow is moderate - upstream to parking lot P (40.258975, 20.464877), if a vehicle is parked there or if you are interested in this section of the river.
It is usual to go downstream immediately after the last rappel in the Babos in Lengarice Canyon. The slippery debris deposits are quite unpleasant here, but are compensated for by the impressive ambience.
At the exit of the tour, you should not miss the opportunity to enjoy a relaxing thermal bath in one of the pools by the old arch bridge or beforehand on the left bank (you may want to get a suitable drink from the nearby kiosk beforehand).

Beginning is nice, then a long, boxing walk. If you dont use second car (road.is very bad) can walk with a red signs (official path around Langarices canion) and do only final, best few rapels. You short walk and time, a d do a best part of canion .... At the end, nice hot, natural bathtub in Langarices. (traducción alternativa)

We had our campsite operator take us to the entry point in a van for 10 euros per person. That was money well spent. We parked our cars in the large parking lot by the hot springs. (traducción alternativa)
