| <b>Acceso:</b><br>Walk back along the main road to a small church, where a steep trail marked for "Passo della Cricca, Alpe Valpiana" begins. This is the only trail leading up this steep side of the mountain. Follow it all the way to the top (~1000 m elevation gain).<br>Upon reaching Passo della Cricca, you enter "Valpiana". The trail stops climbing steeply and traverses mid-slope into the wide pastures of the valley. After about a 3-hour hike (from the start), you will reach Alpe Valpiana. From here, descend along faint tracks through the meadow to the stream bed, located about 50 meters below the alpine pasture.                                                                                                                                                                                                                                                                                                                                                                                                |                                        |                                      |
| <b>Recorrido:</b><br>Once in the stream bed, walk for about 5 minutes until you reach the first bolted waterfall, which drops into a narrow canyon. From here to the end, you will face a fairly continuous sequence of small and large drops, totaling 30 rappels.<br>The highest waterfall measures 115 m, split into 3 pitches/rappels. The stream flows through a deeply slotted environment that is visually stunning in places. There is also a characteristic rappel under a giant boulder inside a cave directly under the flow.<br>After the final sequence of large waterfalls, you will reach a flat section beneath massive overhanging cliffs on your right. There are still 5 simple rappels left to complete; here, on the left, lies the only escape route of the canyon. Following a faint trail through the bushes leads to an old path that descends to Piana Toni and the provincial road (Strada Provinciale).<br>Bring a power drill to potentially reinforce/add anchor points, given the low turnout of this canyon. |                                        |                                      |

**Regreso:**

After the last rappel, continue through the boulders in the stream bed until you reach a path. Follow it uphill to the right; once you reach a cluster of ruins, it descends into the woods back to Casa Capietto and your car (15 min).
