Resumen: (traducción alternativa) Upper open part of the famous Rio Lavarie		
Hidrología:		
Acceso: (traducción alternativa) Access as Lavarie inferior but already park in Tugliezzo (large open space)		
Acceso: (traducción alternativa) After a few meters downhill, a hiking trail branches off to the right (initially asphalted), which you follow until after about 10 minutes you turn left onto the path to Rio Lavarie. The path is well marked on OSM.		
Recorrido: (traducción alternativa) This is followed by 6 abseils in an open area (the highest is split) By now all higher rappels are equipped with 2 anchors. The tour starts with C20 & C10 on the right; after a few smaller sections we come to the big abseil. This is actually a C55 which is split approx. 35m / 20m (both belays on the left); there is room for a maximum of 2 people at the hanging place. Bypass the next edge on the right. Then either climb up to the right to the road and then take the usual access path for the lower part; or follow the streambed.		
Regreso: (traducción alternativa) Continue to the Inferior part (or up the road to the car)

Anchors all in good shape. One old one new.. worth doing because of the last waterfall which is super beautiful. But next time i will do just the lower part of lavarie... or maybe not ☐☐

Once is just about ok if you know all the other short canyons in the area... (traducción alternativa)

It was a pleasant surprise, this canyon is rather enjoyable, but very much different from the well known inferior. C55 intermediate belay is comfortable, however the rock quality is rather low here, there are some sharp edges and loose stones. At the bottom of this, one more short rappel could be added instead of the easy walk around.

We have renovated the intermediate c55. Unfortunately, the rock quality there is mediocre, but now it should be fine again for a while. All other stands are also ok. (traducción alternativa)

This is the first time we have climbed the upper part and certainly not the last. We always added a second bolt to the old single hooks. The intermediate level at c55 could be improved at low water. We had a high water level and it was really worthwhile to walk up the 15 minutes. (traducción alternativa)
