Resumen: (traducción alternativa)
2/4; 1/2 smileys
Forest stream with two beautiful sequences, in between walking and descending a boulder field

Hidrología: (traducción alternativa)
The canyon tolerates a lot of water. Not really any critical points.

Acceso: (traducción alternativa)
Blumenstein park at the church.
Car parking is possible on the right.

Acceso: (traducción alternativa)
After the car has crossed the first stream, follow the hiking trail to the actual stream. Entry to the water where it goes well.

Recorrido: (traducción alternativa)
Two nice sequences of 3-4 rappels each.
The rest is walking and climbing.
A few smaller slides.

Regreso: (traducción alternativa)
Orographic left on the path to the church

The topographic view shows a 20-meter rappel in the upper section, but it’s actually closer to 30 meters. Water levels are low, and temperatures are very warm. As a result, the second-to-last rappel was particularly easy and problem-free to descend. The rappel point is equipped with four bolts; one of them is slightly loose, while the others are in good condition. (traducción alternativa)

Lots of wood in the canyon. Very slippery to walk. Intermediate level in the high final stage at this water level (not) a pleasure. (traducción alternativa)

Very slippery, between the belay in the high abseil (last one) consists of four moderately good holds, which are completely flooded at this water level. (traducción alternativa)

Good alternative if the weather is uncertain. Shuttle (car replacement) with 7chf ride and parking ticket possible. Slippery in the rappels. Some wood in the walking passages. A boulder field with a lot of very loose rock has to be descended. Anchors all still quite good, except in the intermediate belay in the large final step. There four single pitons, partly bent, had to be tightened. (traducción alternativa)
