País: Italia / Italy Región: Liguria Subregión: Imperia Ciudad: Rochetta Nervina		
Dificultad: no tan difícil	Grado: v2 a3 II	Tiempo total: 3h55
Tiempo acceso: 45min	Tiempo tour: 3h	Tiempo regreso: 10min
Altitud de entrada: 430m	Altitud de salida: 330m	Altitude delta: 100m
Longitud del cañón: 2100m	Rapel más alto: 12m	Cantidad rapells: 6
Transporte: A pie	Tipo de roca:	Zona de entrada: km²
Temporada:	Orientación: Sureste	Mejor época:
Clasificación: ★ 4.5 (16)	Información: ★ 2.7 (15)	Belay: ★ 3 (15)
Especialidades:		
Equipo: Cuerdas: 1x30m		
Resumen: (traducción alternativa) Attractive jumping and rappel canyon with warm, green water.		
Hidrología:		
Acceso: (traducción alternativa) From Dolceacqua drive up the valley in the direction of Rochetta Nervina. Park in the large parking lot in the village (2023: 8 euros per day, 1 euro per hour, free for motorhomes at night). Water tap at the sanitary building/back wall. Shower in the sanitary building - only open during the day.		
Acceso: (traducción alternativa) Cross the stream and on the other side of the village follow the signs to a mule track ("Sentiero 13"). Follow the path for 35 minutes to a signposted junction and take the lower path. You soon cross the landslide zone with two large rock debris below the path and then reach the entry point at the Ponte Cin bridge. Fee for ascent - 2023 collection hut was not yet occupied at 08.45 h.		
Recorrido: (traducción alternativa) Entry is at the bridge over the stream. Here you can jump directly to 8.6m (descente). In the following, jumps up to 12m and small, well-equipped rappels up to 10m alternate. In the lower third there are wonderful tuff formations similar to the Maglia. After a rappel between huge boulders, the canyon opens up. The last point is the jump from the dam wall. Bathers are often to be found here. Watch out! There is a place (picture 12 shows it from below) that is often used by commercial operators to build ropeways. There is a VERY well-equipped belaystation on the left which is only moderately suitable for rappels as the rope tends to get stuck in a crevice here. If you are rappelling, then rather orog. right a little further ahead. You can jump at this point, but it is essential to check out the spot carefully. The pool looks much deeper from above than it is and is full of large stones. The water level can best be assessed at the entry. There are no obvious canyons in the critical part of the canyon. The "signposted" emergency exits described by descente are non-existent. In some places, the slope can certainly be climbed with difficulty on the left. There are plenty of places to get out of the water.		
Regreso: (traducción alternativa) Quite laborious through the blocked streambed until you reach a bathing area below an artificial step. Turn right here on a good path back to the village.

Automatisch importiert von Descente-Canyon.com für Canyon Barbaira (aval) Débit était plutôt correct moins. Tous sauts, tous tobogans possible. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20522/observations.html>)

2026-05-11 | System User | |📖|📌|🌊 Normal | 🟢 Completado

Automatisch importiert von Descente-Canyon.com für Canyon Barbaira (aval) Superbe canyon, un régal du début à la fin ! Pour la C10 (facile à repérer, nombreux ancrages sur un bloc RG) le saut semble un peu limite du haut (vasque environ 2m50 de profond...), nous avons pris une option intermédiaire en descendant quelques mètres en rappel jusqu'à un promontoire puis saut de 4-5m sans problème (prendre le relais le plus éloigné en RD). Sinon tout ok, absolument seuls dans le canyon, magnifique !! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20522/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Barbaira (aval) Débit correct + Eau froide Obstacle r.a.s (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20522/observations.html>)

2026-05-02 | System User | |📖|📌|🌊 Normal | 🟢 Completado

Automatisch importiert von Descente-Canyon.com für Canyon Barbaira (aval) Debit correct, magnifique descente, attention le saut du pont est engagé il faut bien viser l'endroit le plus profond et même en faisant ça il faut amortir, attention a la grande vasque au niveau de la c10 elle n'est pas profonde ne pas sauter 2m50 de fond max c'est limite pour un saut de 10m, tout le reste RAS, Et l'encaissement juste magnifique (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20522/observations.html>)
