Flow at checkpoint in medium situation wrt Eldorado Ticino reference picture, quite close to the upper limit (see photo). All the pitches doable, take into account that in many of them the current belays make you end in many cases right under the flow. All the anchor points in order, lot of logs/wood in the canyon after the bridge checkpoint, water in the pool very dark and not clean. The C22 (see photo), right after a road bridge and before the C45 (see photo), we downded from a tree on the right, cause it has a big log in the middle resulting in the risk of rope getting stuck in recovery with high flow if pressed against or below. The final C40 can be divided into C28+C8 cause after the pool there is a belay on the left; suggested to use with high flow to avoid entering the pool with lot of rope (see photo).

We did the trip after rain. Lot of trees in the canyon, okey canyon, probably better options available.

Automatisch importiert von Schlucht.ch für Canyon Navegna, Wasserstand: "Mittel - hoch" Verankerungen: "Ok" Viel Holz, v.a. im unteren Teil erfordert solide Abziehtechnik, um Seilverklemmer zu vermeiden. Schön dschunglig wie immer. (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1101-navegna)
