Resumen: (traducción alternativa)
Rappel canyon in the rainforest with longer walking passages

Hidrología:

Acceso: (traducción alternativa)
From the town of Basse-Terre on the western half of the island of Guadeloupe of the same name, we head north on the coastal road for 42 km (from Basse-Terre airport) (via the villages of Vieux-Habitants, Bouillante and Pointe-Noire) until we reach the village of Ferry on the Anse (Ferry = beach). We continue north on the N 2 and after about 2 km turn right onto a small tarred road that leads east inland. The road leads uphill and branches off after about 700 m. To transfer the vehicles, we first take the road to the right and after about 1200 m we reach a larger parking area for our car for the exit.
Take the second car back to the junction and turn right uphill at a sharp angle. About 2200 m from the junction, we reach the highest point of the road (Sommet du Morne Mazeau, 615 m above sea level) before it descends again at a right angle to the left. Here we can see a seismological site on the left and information boards at the start of a footpath to the right of the road. However, we have to drive back about 250 m and then see a small parking bay on the righthand side. We park our vehicle here for access.

Acceso: (traducción alternativa)
Almost exactly opposite the parking bay, an inconspicuous path disappears into the forest. We follow it in a roughly southerly direction. It changes direction several times at the beginning, leads at first slightly, later steeply descending down to the stream. On the map the path runs approximately on the green marked border of the national park.

Recorrido: (traducción alternativa)
6 rappels, in between walking and downclimbing

Regreso: (traducción alternativa)
At the dam on the iron bridge through the lattice gate out to the right and on the slope to the car.
